

Name	Option	Comments
Ken Collings	Option 2	I think that you are doing this exactly the right way. More power to your elbow
Phil Harris	Option 1	In my opinion the whole amount should be distributed among the consumers but because you don't give that as an option I have to go with option 1. I just don't see why consumers who do the paying are being forced to be providers to all sorts of projects most of which we don't know anything or little about.
Melissa Hodgson	Option 1	TECT need to make these organisations more accountable as to what they spend the money on and they should be made to fundraise first not just get a hand out. Many consumers could use this money just to live. In reality you are just paying directors of these charities huge wages they do not deserve.
Emma Fray	Option 2	I choose Option 2 for the special distribution. I would like to ask why the funds cant be split evenly across the three though, why cant it be divided into equal thirds across Consumer Rebates, Transformational Grants and Top Up Current Grant Funds?
Margaret Murray-Benge	Option 1	Our power bills are high, and I am a loyal customer.
Trish Stewart		Please be aware that the Ombudsman, Human Rights and Consumer Affairs have been mailed your unlawful proposal and asked to investigate. You took peoples rights away saying they have to donate part of their rebate to YOUR charity of choice when they can not afford to do that nor wish to do that. Also making people give out their bank details is also not legal or ethical. Taking away peoples choices is straight out bullying and an abuse of power. There does not seem to be any decency or concern for the set up of the Trust by any of the Trustees and some consumers have had enough after last years debacle. As to your excuse that old people can't get to the bank to cash a cheque so you could do this is rubbish. As a pensioner and a carer in the past of the aged it does not wash. If they can't get out to cash a cheque then they can't get out to pay their bills, go shopping or to the doctor and would be in a rest home or have a live in carer. So in view of these facts I would like my full rebate sent to me by cheque as per usual without having part of it taken out for charity which I can not afford and which you have no right to take off me as it is my rebate for what I pay to Trust Power and no I do not want the amount on my Power Account which will not help me at all and leave me with no Christmas like so many others.
Rod Bell	Option 3	Thank you for this information and exciting to hear of the extra dividend received. Our feedback in regards to the extra 21million would be that we would support option three, we would love to see any funds go back into the community and we know first hand the incredible difference that TECT funding makes to the community and its families and anything that would cost only a small individual cost of \$295 would be worth ten fold in the future for those that benefited from the distribution back into local projects which will make a difference we believe well beyond the injection of the dividend amount back to us as. Thanks you again for all doing in the community. Kind regards, Rod Bell, ONZM
Annastacia Barclay & Nick Baty	Option 1	\$295 to be paid to consumers in the middle of the year will make a huge difference for a lot of families. This could be food in the cupboard or the power bill paid or the car fixed.....all things that make a difference.
Rosemary Ross	Option 1	We should be getting the whole amount, Nothing to transformational grant initiatives or to top up current grant fund. They get enough of our money anyway.
Tw & Fj Poulgrain	Option 3	We particularly support for the Emergency Services sector to benefit from a portion of the \$7.35m special distribution. We also feel the existing 80%/20% split for annual distribution is sufficient for Current Grant Funds, without further top-up from this Special Distribution.
Ken. Evans	Option 1	Grants given on a "Race Basis" are not acceptable. The Division caused by the race based decorations at the Kollektive are the sort that motivate hate by extremists.
Elinor Rawlings	Option 1	Trust does a wonderful job of supporting the community, but after some research it is one of the more expensive power companies. Lower charges especially for superannuates and low income earners would make people less inclined to think of changing providers and encourage people to enroll.
Gordon Wakefield	Option 1	Trustpower rates are high. they are only giving back what has been over charged in the first place
Ann Patrick	Option 3	Think this would be a good opportunity for TECT to put good amount of funds into some worthwhile projects in the community, both social needs & facilities
Alan Mathews	Option 1	Why would we even consider giving this massive amount of money away to a group who wouldn't know what to do with it and waste it. thanks
Stephen Boyle	Option 2	Option 2 assists with compensating Trustpower customers for the premium price they pay through Trustpowers uncompetitive rates, while also providing a good contribution to worthwhile community projects. Well done!
John Kint	Option 1	It would be better if you gave the whole lot back to the consumer instead of some worthless project. This would make Trustpower more attractive for consumers. It would get more customers for you.
J Gravit	Option 3	I recognise some would really benefit by the extra payment. However it is a one off windfall that should support the whole community needs with significant investment, not just those who happen to be Trustpower customer this year. Even this extra is not enough to make a measurable difference to those in real poverty. Please take this opportunity to think of our big picture strategic investment possibilities. Make a bold decision and then examine options that will have lasting benefit. Eg half way house accommodation, a museum, first year student hostel, a housing partnership shared equity funding structure, community health and support centres in new suburbs- just to name a few current.
Marianne Pretorius		Dear Trustees, We appreciate the special distribution that is allocated to us by Trustpower. The proposals however as proposed is not acceptable and I would like to see a 4th option to be included in your proposals. This option is to be one where this special distribution is paid out in full to the shareholders. This view towards having a total payout is shared not only by myself, but in general when looking at the fb posts on your page and responses on a post I had on my FB page. We as shareholders do not like to be held at ransom with limited options and we would go as far to say that the payment should not be limited to just one option throughout when this dividend is paid out. It should give options and then according to what the shareholder chose, the payouts is processed. The reason for having a full payout to myself is that already as a standard you have a significant proportion that is allocated to community grants and paid towards projects which we might not even want to support. With that said, by having a payout in full to me we have a choice of our own to contribute towards a charity of our own choice and be able to through the tax credit get the benefit to the smaller charities and community projects too. This will be a better spread and much more acceptable than having to once again add to the grant funds where the smaller initiatives do not get funding and many a time not have sufficient funding to broaden their services. In other cases it may be a welcome bonus to help some of our customers to fill the gap or be able to spend it on things they seem to need but not had the funds for. Thinking about people that need to pay off medical expenses, get the dentistry done or be able to afford to get a new pair of tyres or perhaps enjoy a few days on holiday. Something that sometimes getting overlooked by the Trustees in their decision-making since they fall into another income group and these things are not a worry to them, rather the next new model of some fancy car or overseas holiday. As said a large portion of the "standard" dividends are already allocated to community projects or grant funds. This special distribution should be paid out in full to the shareholders.
Mary Dillon	Option 3	What a great windfall. Please use the funds for some long term sustainable benefit in our communities. Not sure why you are asking us. Just do it and create a legacy of long lasting well-being in the process. Good luck.
Peter Butterworth	Option 2	I think this option will appeal to most Consumers. They will all get a reasonable rebate and at the same time show some compassion for others by contributing to some essential Community Services
Kim Aldrich	Option 1	Why are you making decisions on behalf of Trust power customers. Just like the last time you tried to make decisions. Have you not listened since the last time. We really will be looking at a different power supplier and will be asking Trust power why they are letting you make these options and decision making and if we dont get the \$295 we will be walking after 21 years and so will a lot of their consumers. So sick off you lot
Rg & Sm Olson	Option 1	I hope people will vote on this. I think it is a silly way of doing this. Too complicated
Adele Barber	Option 2	We like to help different groups out and this would allow us to help more
Paul Tustin	Option 3	I strongly support option 3. Option 3 would be truly transformative for Tauranga. And because its funded fully by a special dividend it doesnt detract from the usual distributions that are to be made to consumers. And yet consumers will benefit indirectly from many of the grant fund projects. Option 3 is truly a win win for all
Judith & Alois Denie	Option 2	Without your loyal consumers contributions no community grants would be possible. Therefore option 2 is fair to both parties. Also agree with supporting the four specific areas listed.
Laxton Smith	Option 1	Stop giving our money away
D Howie & P R Davison-Howie	Option 1	Awesome job guys. Pleased to contribute as we are volunteers in Greerton and realise that many people need a little income and crowdfunding is proving to be very beneficial. There are wonderful projects going on in Tauranga and we would be pleased if we could of help to you in any way.
Scott Reid	Option 2	I like this option, something extra for the community and something extra for me!
M D Rahiri	Option 2	I am passionate about some of these funds being directed to support the four significant areas as outlined. All are pivotal areas and if some sort of significant change can be made, it is a change for the betterment of our community and those who live in it. Our environmental sustainability determines our future and we need to do something now. Our Emergency Services are vital and helping to provide safe and healthy homes for those less fortunate is our duty. Good job TECT.

Knowles	Option 1	Our power is very expensive so as a consumer I deserve to receive the larger amount.
Rob Terry	Option 2	The four areas for transformational grants are all well chosen and consumer also benefit.
Elizabeth Holm	Option 3	Ideally we would prefer a 4th option - namely that the full \$21m be used to top up the current grant funds.
Bruce McDougall	Option 1	all profits must be given back to the owners of the trust, which is all of us consumers. Charity begins at home. Arogance of the trustees is not an option. There are plenty of competitors out there providing a lot cheaper rates.
Nigel McConnochie	Option 3	The support TECT gives the community is wonderful and I value extending that contribution more than receiving a further distribution myself. Good work TECT - keep it up.
Lynette Colman	Option 1	I am horrified that you are taking this to vote AGAIN! Obviously all of the trustees are all VERY RICH. Stop and think how many of your consumers are poor and only with you for the "Tect Checque." I will leave your company if this stops and I strongly believe you will loose 50-75% of your customers for the same reason as you will looses me. Lynette.
E Ann Allen-Lett	Option 3	Our household is not cash wealthy nor considered poor. ( both superannuated ) we feel the benefit for this one off windfall would have a more lasting useful outcome given option 3. Both the other alternatives would buy groceries for 2weeks and maybe a cinema ticket! And so be forgotten.....
John Coster	Option 3	The rebate to individual customers is a trivial amount, with no real effect. By putting the full amount to community causes some real good can be done.
Raelene Flay	Option 1	It is my opinion that it should all go back to the consumers. After all it is the consumers that have paid for the supply of the services that has allowed this surplus to exist. We ought to have it back. Just like ACC....has overcharged policyholders and is now paying it back....with interest!
Debbie & Richard Hallam	Option 3	Because this is a one-off, we think it's a great opportunity to support the community.
Julianne Parkinson	Option 1	Really - \$0 to eligible consumers - this is very reminiscent of recent events - do you not listen to the consumers!!!! Seriously - all the wasted money to try and see if you can slither in another fast one and confuse people YET AGAIN!!!! Will you also use the percentage of people voting against the actual number of eligible consumers as a reason to not conform with the consensus you get.
Vic Mailman	Option 1	Trustpower Rates are higher than other companies so if I don't get the rebates I would leave Trustpower
Pauline Bailey	Option 2	the four categories would certainly benefit from the \$7,350,000 distributed and I think this option is excellent
PI And Nd Ott	Option 2	Trust power charges are higher than other suppliers so I would want some sort of rebate to compensate
Jill Armstrong	Option 1	Lots of power companies out there, why would you "NOT" pass it on in full to Trust power consumers? Or: is you have that much money to spare from profits, lower our prices please!
Maira Trickey	Option 1	I think the charities do very well from Trust power as it is. Thanks for the opportunity to vote.
Owen Cooney	Option 3	Time for community interests to take precedence over individual interests
Mrs A J Scott	Option 1	Can choose individually to give to other entities. We pay too much for our electricity through Trustpower so all of special distribution should go to consumers.
Judy Mccartain	Option 2	As this is a one off payment it would be nice to share it with new initiatives locally
R. Anderson		Once again our trustees have shown their lack of interest in their consumers by omitting the very important fourth option....All of the 21m to consumers and nothing to the community. This is not a good situation coming hard on the heels of the disastrous 2018 proposal, it is but another example of our trustees unaccountability to the creators of wealth ""THE CONSUMERS""
Jacqueline Stovold	Option 3	These community organisations deserve our support- and are worth more than the money in my bank.
Rachael King	Option 2	As much as I need the money, I am not going to be greedy, I would be happy to get \$240 and our emergency services plus others listed can have the rest. They do a fantastic job and deserve something extra also.
T R & J P Burton	Option 2	To whom it may concern - greetings. With regard to your above enquiry may we recommend Option 2 as a pleasant compromise and make us all a bit more cheerful in a gloomy world? Regards to all.
R Frew	Option 1	I don't know why you even ask this moronic question, anything that comes to the trust gets treated as income, so the trust policy applies! I seriously think you have a hidden agenda to manipulate the consumer into passing all rights to the trust to do as they wish. Re: how you decide to no longer to pay out the rebate by cheque .... and now when you do decide to consult with the consumer you dream up a cockamainy 3 tiered option scheme! ...and to add insult to injury, your being paid for it. There should also be a forth option, and it involves you lot! your DH trustees seem to be trying real hard to sell their idea to give OUR money away ....this propaganda has got to STOP! The sooner these prats are are booted out ...the better .... or have the buggers already made up their minds? 'm not the only one discussted with this new trust board efforts
Matthew Moynihan	Option 2	I would like to see this distributed by option 2, the transformational grant initiatives look great.
Susan Smith	Option 3	the main reason I stay with trust power is because of its grants to the community there are cheaper power and internet companies out there but I like the idea of the profits going back to the communit
Kevin And Lorraine Wearne	Option 3	A great opportunity to make a real difference in our community
Joanna Lilley	Option 2	This option gives a little windfall to consumers who can either pay it against their next invoice or use it for something else as well as supporting transformational grant initiatives which are well selected
C A Yandle	Option 1	Distribute to the consumers/payers and let them decide who to donate to - it is the consumer's money! The 20% impost you propose to deduct should be removed and the whole amount distributed to consumers.
L Kirkham	Option 1	I have chosen Option 1 for two reasons. 1. I have minimal confidence in the ability of community agencies and even charities to spend the money appropriately. 2. The funds be returned to consumers who then have the option to donate to whatever charity they chose. Ultimately it's about providing choice to consumers.
Jo Makgill	Option 2	Option 2 is my preference because the beneficiaries of the community funds are named so I can see exactly where the \$50 I'm contributing from my share of the special distribution fund is going. These are areas I am very willing to support with this portion of my share.
Natasha Williams	Option 3	Resist the inevitable "we want the money" respondents :)
Bill & Maureen Jacob	Option 1	Do you have short memories? Not too long ago the suggestion of changing the distribution to other than consumers was soundly defeated. Listen up!
Janet Buckton	Option 3	I'll get more value from community contributions than I will from a cash payment.
Stuart Old	Option 2	I like the sound of some going to the options listed. These initiatives should be given more.
Joyce Adams	Option 2	This extra is timely for me as I'm struggling at the moment with changes in my circumstances. However if we can make a real difference by sharing a small portion I think that's great. All 4 causes are worthwhile but I would be cautious about how much good we can do in the first 1000 days of life. Good cause but the money could just be absorbed without achieving. There needs to be better standards set for the many fractions having a go at this at the moment. I have witnessed this and it must be confusing for some parents. Many people give opinions. I believe a New Zealand phychologist Dr Natalie Flynn has written a very good book "Smart Mothering" to help parents as she noticed a lack of researched guidance when she had her family. She has spent 5 years researching because young Mums including herself at the time, don't have the time or energy when they're going through it. Apparently Nigel Latta has celebrated its arrival. Perhaps it could be put to good use to co-ordinate and support what's out there
K & C Tempest	Option 3	Like to see the whole sum held for a significant community project like the proposed Tauranga CBD Leisure centre at Memorial Park
Anthony Rabbidge	Option 2	I like that grants will go to emergency services in option 2 + as a consumer we get something as well
L.Kelvin O'Hara	Option 1	Trying to play God again??? Your consumers can decide personally where they want the funds to go. GIVE IT ALL BACK TO THE CONSUMERS!
Paul Wiseman	Option 3	top up Papamoa Surf Club Build fund
Denis.Henderson	Option 1	I thought we had already had a decision on rebates and that they would remain with Trust Power customers, But the rebate figure was much higher than the figure currently stated. The profit made by TECT must be returned to its customers, that is what it was set up for from its inception. The giving of Profit Funds to Charities as decided, by a small group, Does and will always be open to Criticism as to which charities and why, I certainly do not wish to throw my money away on some of the ideas and organisations suggested, That I would not cross the road to support.
Bev Oakley	Option 2	This would help fantastic community services.
Marcus Niles	Option 3	The \$21M would do so much good for our community. The \$240-295 is not an expected or budgeted amount for consumers, so noone is relying on it. By giving it to the community it would have a far greater impact for all of us.

Jenny And Graeme Purches	Option 1	We are deeply concerned about this proposal. We have selected Option 1 because TECT has consistently returned to consumers less than the 80% which consumers agreed to in previous consultation rounds, and the document supplied this time is again deficient in terms of explaining how TECT arrived at its three options. Sadly the three options demonstrate a strong element of predetermination in terms of where any money allocated to grant funds will be spent. We ask that more effort be put into correcting this errant behaviour, as any money spent on grants should be determined as part of each grant application and decision making cycle, not as based on the allocations previously consulted upon. This in our view is unacceptable. We do not recall any consultation that permitted Trustees to predetermine the allocation of funds outside of that put to Eligible Consumers in the annual consultation cycle. It is not up to TECT Trustees to decide about how money should be spent transforming "our" community. That is up to consumers. Once again the TECT Trustees appear to have broken faith with the beneficiaries of the Consumer Trust they represent, by effectively issuing themselves a predetermined licence to allocated funds in a manner not agreed to by Consumers in the annual consultation cycle. It appears that Option 1 is the closest to what Consumers agreed to, and that forms the basis our out choosing that option.
Lorraine Taylor	Option 2	Option 2. Will help to pay for my car to be serviced and give some to the community.
Lis Sharp	Option 3	My husband and I are philanthropists. We agree with giving our share of this special distribution away to charity. Well done for suggesting it. We hope you get support for this option.
Fiona Williams	Option 2	Very good causes who deserve this payment in option 2
Maureen And Spencer Bailey	Option 1	We don't mind giving to charity but we like to chose our own charities.
Holly Moore	Option 1	I have my own charities that I donate to.
Christa George	Option 2	Great initiative. Particularly like the First 1000 Days.
Trish Coates	Option 2	I feel this is the most reasonable option as a pensioner who is finding it harder to make ends meet. I applaud Tect's motivation and feel the Board of Directors are moving in a responsible and humanitarian manner. Great work. Thank you.
Ray Lobb	Option 1	I don't wish to see what the trustees call transformational grants being undertaken. The trustees could end up purchasing the Mills Reef vineyard following the fine example set by Marlborough Lines. The fact that this special distribution has come as a surprise suggests somebody/everybody is asleep at the wheel? Stick to your knitting as you have been informed to do very strongly on previous occasions and distribute the funds to eligible shareholders. No white elephants thanks.
Brian Simonsen	Option 1	Thank you for giving us an opportunity to air our views of your proposals. Here you go again..... to take more off the Funds due to Trust Power consumers. Did not we recently voted a Trustee off the board of Trustees when he wanted to change the "Status QUO". We then voted for people we understood would vote for the "Status Quo". It appears that is not so ... how distressing and I hope that us mere mortals ... can again encourage another two trustee's to replace two of the incumbents at the next election. There are enough funds already released for other things ... and it appears that you lot have not any empathy towards us and have ignored the financial difficulties of a lot of lower income consumers struggling to make ends meet ...and this also applies to a large number of pensioners. They would enjoy a little treat with these additional funds. I vote for Option 1 ..... why was there not an Option for all the funds to be given to the Consumers? And I do not think that your present "secret" office is friendly to consumers ... it took me ages to when I called at a downstairs desk who sat me in a BASIC cubicle pending the appearance of one of your staff members to come downstairs. I would have enjoyed being in your office. I may be a bit grumpy but I think it is in order.
Jeff Peet	Option 2	Thank you all for your fine work on the TECT
Simon Ellis	Option 3	None of the above. Give all to a single major project eg the Museum where the TCC is not in a position to provide full funding. This will make a significant difference to the city. I am not involved in any pro - museum group. To provide funding to Emergency Services, First 1000 days of life etc should come from central Govt, and any contribution of funds will be lost, and subsequently have little impact overall, even though the groups are worthy recipients, Go for a single major project that will leave a lasting legacy.
Shack Fong Kennedy	Option 1	I believe individual eligible consumers should decide for themselves how they want to spend what they are entitled to. As for us, we make sure our charity donations go directly to the persons who need them, not to the charity groups that spent most of their proceeds on administration cost. Also, we tend to focus and prioritize on human needs, rather than things such as art, sport, museum and other wishy-washy stuff.
Kim Braid	Option 1	As a TECT consumer, I feel any additional funds should be returned to customers as a thank you for loyalty and continued custom. In my own personal circumstances, any special distributions paid out to me as a customer of Trustpower helps to make things just a little easier. Thank you for the opportunity to give feedback.
Greg	Option 1	Option 1 please if I want to donate it my choice to decide who is to receive it
Philippa Lewis	Option 2	I appreciate this special distribution and feel believe the community will benefit from the additional funds especially in the areas outlined. Being a pensioner on a limited income I know I will appreciate the extra money while also feeling I have given back to the community.
Brian Pointon	Option 3	As this is a one-off windfall, it would be best to utilise it all for the long term benefit of the widestcommunity of Tauranga. Having already received the usual annual rebate, individual consumers are not really disadvantaged, although I realise that some of the poorest people would see greater benefit in receiving the extra cash in hand.
Warwick Lampp	Option 2	If anything I'd drop the payment to customers to \$200 and then put \$9,625,000 towards transformational grants. This gives a bigger leg up to those initiatives, that may well make a critical difference.
Kay Whittaker	Option 1	I would like to make my own donations. After last year when you tried to rip everyone of I don't trust you folk to do the best thing for the consumer. The money should be given to the consumer only. Trustpower consumers provide a masses amount of money already to the community.
Melanie Zajkowski	Option 1	Trustpower is a very expensive power company so these payments help give us something back
Tapene Mika	Option 2	It would be nice to see some of the money spent on the transformational grant initiatives
Wr Birch And Jm Scheuber	Option 2	Option two in our families opinion gives us a return, but also benefits the organisations in the Community that we strongly believe will make it work for not only themselves but the whole community will benefit, from the hard work and dedication these organisations put into their fields. Option two is a positive step forward in rewarding loyal customers whilst still donating to worthy causes.
K F Reeves	Option 1	As per current longstanding distribution policy.
Suzanne Lines	Option 1	I think that the councils get enough money to be doing things for our community, we struggle weekly and any bit helps us.
Kf & Br Sutherland	Option 2	Option 2 appeals to us as consumers as it gives benefits to consumers as well as donations to charity
Krystal Gamman	Option 1	Option one sounds like a great choice
Brent Ericksen	Option 1	will help with bill payments over winter months
Brett Wilton	Option 1	You have already had feedback on the distribution method in the last fiasco which was unanimous in Option 1. You should desist in this constant rhetoric of changing the distribution method. Option 1 is how the Trust was always intended!
Aramoana Andrews	Option 1	Have you thought about scholarships?
Ms K L Landsman	Option 2	As I have recently found out, emergency services need more funding and more administrative support as the continuation and efficiency of their service to the public is vital
Suzanne Farrow	Option 1	While charity is great, and I do do a lot in my community to help others, this extra help would be so helpful in my current situation where things are very tight. Also, as a banker, I see peoples accounts and financial situations every day, and I know first hand how much this small extra amount would really help so many families.
Colleen Puhara	Option 2	I vote option 2. I can't see if there is a check box next to the options as it is cut off in my screen, so I would appreciate that this comment will be suffice.
Felicity Morgan	Option 1	People should have a free choice to make donations to whatever organisation they choose
Stuart W Duff	Option 1	With power price continuing to go up, up, up every possible benefit for power consumers helps. Not selfish - just practical!!!
Timothy Hickey	Option 1	There are already enough community projects and grants.
Tracy Haar	Option 1	There should be another option saying the money all goes to the consumer . If there was I would tick that option.
Helen Heath	Option 3	This is extra to what we would normally receive in November so I think we should use it for grant initiatives/funds.
Robert Craig Scott	Option 1	I am 80 years old and my only income is the ol age pension
Colin Olesen	Option 2	It would be good to see out Community benefit
W A & S J Jost	Option 2	Option 2 is good distribution!
Fiona Mckenzie	Option 1	we already give to lots of charities, so would like the refund for ourselves to give to our charity choice
Olesen Accountants	Option 2	It would be good to see the Community share in this windfall
Morgan Hardy	Option 2	I don't support option 1 (or 3) because of a lack of transparency over what the iconic projects are. I don't think this should be back door funding for a museum but I am happy to support the community
Norman Mayo	Option 1	this would make up for the extra power cost we pay in our area., which places outside the trust area do not pay.this was never the intention of the original trust,which i was on.
Gj Westlake	Option 1	Option 4 should be all funds allocated to eligible consumers my vote

John Mcleod	Option 2	This is the most reasonable approach
A. Vermeulen	Option 1	i need the money, i live on only Super An
Sharen Watson	Option 1	100\$ distribution to the consumers of Trust Power should have been one of the options Why wasn't it?
Donna Pearce	Option 1	Tect continues to alter the policy laid out and is syphoning funds away from consumers, irrelevant of the wants of those that these funds are meant to go to. I fail to see how you can continue to be allowed to ignore the basic structure of Tect and suit yourselves.
John Megahy Russell	Option 1	living on a pension this windfall will help
Linda Williams	Option 1	Rebate already been reduced this year for those people who have power gas and telephone with you so this will help make up the difference
Derek Smith	Option 1	Consumers as customers must have preference over donations
Gerald Greig	Option 1	I believe all funds should be distributed to consumers and they can decide individually how to deal with the funds
Lucy Mccullough	Option 2	or option 1 ;)
Wa & A E Garrett	Option 2	Thankyou most appreciated
Christine Fair	Option 1	Option 1 would be fair for all concerned.
Sue Jayes	Option 1	Why is something as sensitive as this on a Non Secure website???
Barry Scott And Jean Sayles	Option 1	We're pensioners. We need the money.
Peter Myson	Option 1	Enough money goes to good causes already and were having a tough year here and need it in our account
Samson Nand	Option 1	i prefer to decision choose where my share of donation goes.
William Jones	Option 1	Option 4...100% to eligible consumers is not offered. Why?
Mark Odwyer	Option 1	Dont Need a committee telling me how I should make donations.
Storm Alexander	Option 1	I am on the minimum hourly rate working 35 hours per week, supporting two children in rental accomodation. This added payment means we could pay for winter heating instead of or as well as putting many layers of warm clothing on. I didn't have any heating at all last winter because I just couldn't afford it. It's a struggle to pay the power bill each month as it is.
Val Kivell	Option 1	An extra windfall would be much appreciated.
Graeme & Sue Millow	Option 1	Its our Money, we can now give to our own projects we support.
Julie Sheehan	Option 2	I would like to see the payout for option 2
John Foster	Option 1	That's a long time customer I think that all rebates especially special rebates should be paid to the consumers I think this is fair I do have the chairs and trust power and it's a good company and I think the community gets plenty of money from their income
R & H Bryson	Option 1	We need to have some positive reason to stay with Trustpower as we are pensioners and there are cheaper options around.
Raewyn Rishton	Option 1	Option 1 to the consumer
Russell Lockhart	Option 2	I prefer option 2 as it gives me a one off \$240 as well as \$7.35m in grants to worthy causes. Thanks.
Sr & L Bielby	Option 1	Special dividend should be distributed as per the usual dividend to benefit and consumers as well as a some top up to grant funds.
Anthony Mckenna	Option 1	As a university student I need all the money i can get. :)
Karen Brodie	Option 2	I believe that option 2 provides greater benefits to the wider community.
Mr L J Pepper	Option 1	For pensioners this is the logical option
Kelvin O'Hara Real Estate	Option 1	Try relating to the majority of Trustpower clients who are not, or do not wish to be, tech savvy for openers. Some cannot even afford to be! Where do the OLDER a/c users get appropriate recognition? Emergency services--we all use them. First 1000 days of life What about the last 1000? Safe and healthy homes we all need them. Environmental Sustainability nice thought depends on what you do or promote
R.Roa		Supported option 1 and 2
Clarry Goble	Option 1	The rebate to consumers is very poor. What happened to the internet rebate to the consumers. This doesn't look good for Trustpower clients. Could be time to move on to another provider. There doesn't seem to be any loyalty to long serving customers. It's a struggle for the low income earners. The consumer should be able to decide if and when to make donations to the community.
Dave Muir	Option 1	ALL of the money should be paid out to customers!! Cant wait for the next election.
Raewyn Bennett	Option 2	I am not confident about how transformational agencies will be chosen otherwise I would have chosen Option 3.
W. A. Patchett	Option 1	Trustpower account holders, or consumers, are the ones who generate the bottom line. They should therefore be given first consideration, regarding any financial rebate
Martin Newnham	Option 1	I feel that option 1 should be the option used if consumers wish to donate they can do that themselves.
Sally Ramshaw	Option 1	This would be much appreciated in winter for a pensioner like myself. thank you
N J Cull	Option 1	By this request the Trust is ignoring the overwhelming vote of Trustpower consumers and Trust beneficiaries last year to keep the status quo. Trustees surely have the obligation to work in the best interests of its beneficiaries and allocate all income on a status quo basis. It would appear to me that the Trustees are acting more like a community trust by trying to build a case for the special dividend to be put into community projects.
Maketu Ongatoro Wetland Society Inc	Option 3	We actually think you should keep 50% in your long-term fund to build capital and future-proof your ability to provide transformational funding throughout the bay.
Julie Tito	Option 1	Tauranga is such an expensive place to live now. Rates are going up and up and it's a fact that Trustpower customers pay more for our power here in Tga than their customers in another town. Consumers should get the full amount.
Warren Karlsson	Option 2	i would like to see the Emergency services share the total of \$7.35M so we can all benefit as a community from their dedication and the need we have for them when unexpected.
Mr D B & Mrs M Muirhead	Option 1	I believe that Option 1 provides the right balance in terms of funding.
Jon Gebert		Distribute \$10M to consumers and split the rest between options 2 and 3.
Bruce Woolley	Option 1	Well Done Tect
Lois Isaacs	Option 2	I have always been concerned that the St John's Ambulance Service is funded only from donations and would love to see them get a boost that would enable them to keep their equipment up to date
Dale Douglas	Option 1	There are a lot of people struggling with feeding their children and clothing them. This payment could go a way towards helping them.
M L Youens	Option 1	suits us more
Julie Nicholson	Option 2	Prefer more to the emergency services, and to ALL under 2y olds (not just the 'lower socio economic' groups)
M R Weaver	Option 1	As a pensioner any rebate is welcome
Ken	Option 1	In my case it would help my financial situation as I'm on a fixed income
Kieran Chesbrough	Option 2	Option2 is a great compromise option.
Trisha Cameron	Option 1	it will be much appreciated...as i am paying \$420 a week rent...which is more than one week's pension...and cannot get an interview for a job= ageism i think...
Yvonne Gupwell	Option 2	I would also be happy for the distribution to be 50% customer and 50% split between the grants.
Jamie Kahn Genet	Option 2	While my first preference is option 2, my second preference is option 1 and I would like that to be noted.
Sg And Ea English	Option 2	We think sporting events get too much already
Bj & Ja Catchpole	Option 1	We strongly believe that the bulk of this dividend should be paid to eligible consumers as we chose Trustpower for these types of benefits. While we are happy to see Community charities receive some benefit, the Consumers should receive priority.
Jackie Mckeown	Option 2	I think this offers a good balance between value to consumers and value to the community.
Lena Wihapi-Paul	Option 2	Option 2 13.65M to eligible consumers (\$240 each)
Suzanne Hart	Option 1	I think every kiwi family needs the extra funds these days
David McDonnell	Option 1	We need to maximise returns to shareholders and some to community as per Trust Deed
George Eric Armitage	Option 1	This keeps the 80/20 split consistent on all income received as already agreed upon.
Howard Wood	Option 1	This maintains the 80/20 split that currently is the accepted and consulted balance between consumer and community benefit.
Mark Clayson	Option 1	Regarding the special distribution, you only gave 3 options. You must offer the option of 'all the distribution to be given to consumers'. By omitting this option, you are being deceitful, unfair and arrogant. Please offer this option to get a fair reflection on what the owners of this distribution want.
Mrs Judy Neilson	Option 1	We have a daughter who is a solo Mum and a beneficiary and is struggling with high cost of living. We would love to see her get this little boost.
Robyn White	Option 1	OPTION NUMBER 1 THE FIRST ONE . . . . OPTION ONE.
James P Williamson	Option 1	There should have been another option to have ALL the money, \$21M, refunded to the consumer.
Paul Mccarroll	Option 1	Give me the money and I'll decide what charities I will support!!!
Dallis Hopkinson	Option 1	Our heating bill is high over winter. Any extra will help us stay out of debt.
Eddy Gies	Option 1	current split is fair
Simon Mcshane	Option 1	Would love option 1..... please please please
Hemi Te Area Paki	Option 1	AWESOME NEWS
Alesha Kale	Option 1	I would prefer the bulk of the money went back to the consumers.

Naomi Mcdonald	Option 2	Option 2 would be my preference.
Bernadine Roodt	Option 2	Option 2 followed by option 1. We do not like option 3.
Kerry Burke	Option 1	I believe we should get the full amount not just the \$295.00. The city or govt should pay for your initiatives
Ij & Ma Webber	Option 1	Suggestion that an Outdoor Fitness Park be built in Tauranga for adults. Memorial Park or overlooking the sea Omanu end of the Mount.
Martin Bisset	Option 3	Great ideas
Mr D L Stratton	Option 1	well done
David Mendis	Option 1	another option should be \$21M to eligible consumers to be balanced
Richard F Newson	Option 1	Not enough info on what the charities would actually be doing with the special transformational grant money. I'd rather get the money and give it to a charity that I am fully in support of. I would prefer to see ALL of the one-off payment get distributed to eligible consumers but you have not given me that option to tick.
Stella Hamilton-Baker	Option 1	Then I can choose who to donate. Money to
Peter Kerry Guy	Option 1	Given the present economic climate and people's attitude today, I think this will be the preferred option for the bulk of clients.
Rangi Kopua	Option 2	good to share with customer and community services
Robyn King	Option 1	This would be nice to get that little bit extra on top of our tect chq, as some of us that have been with trust power since day one and could have gone to other power companies for cheaper power but stay with you because this money is like a little bit of compository savings.
R J Salmons	Option 2	A bit for everyone.
Malcolm Wadsworth	Option 1	Best option
Lynn Forde	Option 1	As a pensioner, I am reliant on this top up for those little extras.
Da Leigh	Option 1	This is the account payers money paid by way of higher electricity prices. It needs to be returned to the account holders.
Andrea Chapman	Option 1	Perhaps it would have been better to add to the end of the years payment to save extra admin costs.
Toni Palmer	Option 1	Wow, this was an arduous process to have a vote! Why wasn't account no on the docs?
Harry Crowe	Option 1	We prefer to make charitable donations to charities that we personally support, and are confident with their prudent usage of these donations.
Anthony Cranston	Option 1	I wasn't happy with your choice of donees so opt for a full pay out.
Jeremy And Rebekah Opie	Option 3	We would love to see these funds go to building a museum for Tauranga! We recognise that there are those in our community that could do with a bit of extra cash so option 2 is second choice.
Glenn Campbell	Option 2	My family agrees with the transformational grants in option 2.
H M Mills	Option 1	Need the money.
B & S Burger	Option 1	TECT is a CONSUMER Trust, therefore we feel that the consumers should have the main profit out of the windfall too.
J D Hicks	Option 1	Poorly set out. The segregation lines should be between the voting options not as is. Confusing to some people especially if in a hurry.
K & Byrnes	Option 1	Money desperately needed
Lyn Allison	Option 2	I prefer option 2 as it gives a little to all. I prefer to give donations to emergency services, than many other 'charities'
S Gradon	Option 2	this is confusing, the line separating the different options is located in the wrong box.cheers
S Bagnall	Option 1	tough times at the moment
Murray Crowther	Option 1	CONFLICT OF INTEREST. Your suggestion that shareholders donate their rebates to Acorn smacks of a Conflict of Interest. Your chair Bill Holland has more than a passing interest in both organisations. How about listing a number of options of Charities. A legal challenge to this Conflict of Interest might well not go well for TECT.
Anton Labuschagne	Option 1	I have my own charities that I prefer to donate to
Mr L H Fake	Option 2	Option 2 does not have ambiguous statements of places to give the money.
Doug And Rosslyn Hosking	Option 3	A great opportunity to make a real difference
Claire Stock	Option 2	Yes, we agree to Option 2.
Jenny Jackson	Option 2	This seems the fairest way.
Cheryl Dohnt	Option 1	Being a Goldcard holder we need any cash that becomes available from any source!!! Our turn for charity!!!!!!!
Bryan Christiansen	Option 1	Option 1 allows me to decide what community initiatives to support ... apart from Emergency Services, the recipients of the proposed transformational initiatives are not named, so TECT would be deciding that ... TECT should have named all the recipients to be completely transparent
Hinerau Janet Doherty	Option 1	As much as the community projects are awesome and important \$295 will make a lot of difference for many of us.
Avon & Bev Dickson	Option 2	Like to share with consumers and charity.
Brian Blackstock	Option 2	Seems fair for everyone.
Randal And Michelle Thomson	Option 2	We like the 'four significant areas that will make transformational difference' a lot more than something a little more esoteric as supporting innovative projects and inter-generational benefit.
Elisha A Roest	Option 1	I am living on superannuation, so it would be great to have a little extra money over winter
Linley Slater	Option 1	Power is expensive enough as it is. I would prefer to choose myself what organisations need financial assistance. The majority if the one off payment should go to eligible consumers.
John Bielby	Option 1	the distribution should be to the benefit of the consumer, who could use that money.
Narissa Siemonek	Option 1	I do a lot of community work and volunteer work so I feel as though enough community and would like to keep this money. People are more important than money (not that its not helpful)
Christine Beauchamp	Option 1	Thank you very much for this extra bonus It is certainly welcome!
J E Shearman	Option 1	TECT was a by-product of privatisation, established to protect the interest of the city power consumers; not the wider interests of residents across the district. Leave charity to charities set up for that purpose.
Selwyn Joseph Burborough	Option 1	I prefer to receive the full amount which I can then decide how to use which will be either off my power account or back into the local community
Hayley McCreedy	Option 1	customers deserve the biggest reward
Ryan & Claire Piddington	Option 1	Option one please, because the benefit spreads to many.
Julian Fitter	Option 3	I actually think you should retain 50% and add it top your free capital to enable you to provide higher levels of transformational funding in the future.
Jacques Van Selm	Option 1	I believe recent history shows that people want maximum of the return on their shareholding returned to themselves. We are contributing to Trustpower's profit through relatively high power prices. TECT you are again trying to fiddle Trustpower consumers out of what is rightfully theirs.
Alan Colquhoun	Option 1	We give all our rebate to charity and believe we have the right to choose which charities. I am sure they agree.
Julien Huteau	Option 1	Best option would be 100% to consumers.
Jr Busby	Option 1	As a home owning pensioner every little bit of cash helps especially in light of the huge 47% rise in valuation of Maungatapu. This is going to significantly increase our rates.
Alan Liddell	Option 1	The reference to the beneficiary receiving \$295 rather looks as if it is associated with option 2. A careless reader might well select option 2 by mistake.
Charlene Bardebes	Option 2	Option 2. We pay dearly for our loyalty and we do so deserve a little something back. Like to know where funds are going.
Anita Foley	Option 2	I think this one seems fairer
Alison Adams	Option 1	Consumers before charity, not everyone can afford to be terribly charitable with the funds they are due from the Trust. Contributing consumers have needs, too.
Keith Glass	Option 2	We believe that the emergency services should be government funded so this option would greatly assist them.
Ray Goldfinch	Option 1	need all the income can get in view of the rapidly rising costs of living under this Government
Patrick Donohue	Option 1	I have ticked option 1 but i think all of it should go to the Consumers
J M Simons	Option 1	The clue is in the name of the Trust. "CONSUMER". Consumers should get maximum benefit and be free to distribute funds as they see fit.
Malcolm & Margaret Garthwaite	Option 2	We would like an Option 4 which is \$13.65M to eligible consumers and \$7.35M to Transformational Grants
Pete Morris	Option 1	Option 1 ensures that most the money goes to where it really belongs. Individuals can then decide if some of the money they rightfully own is to go to charities of their choosing.
Melany Brown	Option 2	Option 2 is a nice balance for all.
Meagan McIlroy-Hoff	Option 1	I would like to see option 2, in particular because it supports emergency services.
Julie McCormack	Option 1	i would like to be able to choose the organisations i give my money to.
Margaret Somers	Option 1	Not everybody benefits from money put into the community. This money should wholly go back to the consumer. If it wasn't for the consumer this money would not have happened.
Robert Searle		Supported option 1 and 2
Paul Collins	Option 1	Believe the existing process of distributing rebates and the one reaffirmed during the recent consumer consultation process should be followed by the Trust
Peter Harnett	Option 1	I think Trustpower users/members should get the bulk of the funds. Does not seem fair that non-Trustpower members can get benefits while using other Power Co's.?
Wayne Keith	Option 1	Pensioners, need financial help. Power bill is a big chunk of our budget.

Denise Bartlam	Option 2	I think this would accommodate a wide range of people and their needs
Marjorie Groote Veldman	Option 1	I was unable to get into your website to say I would like my rebate paid into my bank account which you already have as I pay by direct debit. Please confirm.
Craig Griffin	Option 2	Option 2, from a limited range, provides an extra 35% of the special dividend to new recipients. This is largely possible because of the continued market support of Trustpower consumers, who should be rewarded for their loyalty to local business.
Jennifer Myhill	Option 1	The details as to where funds would go is too general e.g. emergency services
Isobel Huggard	Option 1	As a new Widow and a retired person I find that the support given through the Trustpower account gives me security that I am being looked after. Many thanks Trustpower.
Toni Cranston	Option 2	Dont know of the other 2 funds and havent seen them actually in action so option 2 feels better for us
Linda Askin	Option 1	I found this whole thing utterly confusing and the option website very hard to find online
Grant Vincent	Option 2	If someone could give me some examples of Iconic Projects to clarify where funds directed to them would be spent, I may change my option to option 3 but would like that clarification.
MJ & Cl Tailby	Option 2	Option 2 is preferred
Ann & Robert Davidson	Option 1	Have the Trustees not yet grasped that consumers expect the current distribution of TECT income to continue as in the past. In view of local demographics and the result of the recent consultation on same, the decision to cease use of the traditional annual cheque indicates the Trustees are seriously out of step! Further - perhaps the Trustees might inform their consumer base as to why those consumers should gift funds due to them to 'transformational' community projects (and the Acorn Foundation in particular?) selected by the Trustees - without any regard to the fact that non Trust Power customers in the community would get a 'free ride' at TECT consumers expense. TECT Trustee requirements are basic and simple - it is not the Bill Gates Foundation - please just get on with the job!
Nigel Byron	Option 2	Instead of a 'one size fits all' solution why not allow each eligible consumer decide which option they wish to have - different people have different needs and desires of where grants should be applied.
Brent And Dianne Sanford	Option 2	It would be great to see some money go towards emergency services (Rescue Helicopter, Volunteer Fire Brigade, Ambulance). But the consumers that pay and use the power should also benefit.
Ivan Small	Option 1	Consumers should get 100%
Laurel Hitchcock	Option 1	We have a young family and a difficult decision, but we could do with the extra money. We work hard but money doesnt go far with mortgages and living costs in NZ
Lindsay Aplin	Option 2	You could have a 4th option that everyone gets a piece of the pie. Not all of power account holders are rich they just scape by with the high cost of power, so it would be good to get a little bit for power bill. None of your options are good for all, and the figures do not add up properly. Heres my option 4. \$700000.00 for all 3 parties that is fair Im ok with this and it some consumers what to give up their share they can. You people are to much like dictators and think we should do what you want, why do you make it look complicated when it doesn't have to be and everybody could be happy and get something out of it. Because of you people I am going option 2. So I suggest you start rethinking how you make decisions from now on. Have you forgotten what people said when you tried to give us a one off payment and then we miss out after five years. Stop being lazy and wasting time and money and spread it evenly between all 3 parties.
Trevor Mildon	Option 1	I see NO funds going to individuals or organisations that merely plead poverty or hard done by. The funds MUST be for the good of all at any level in our community. eg Safe and healthy homes is not my responsibility it is the land lord or home owner to respond to that standard that is now set.
Hilary Colls	Option 1	For me I already donate where I wish. As this is a one off from Trustpower and they have said it is for consumers then that is where it should be going. There are many people in our community who could do with this and charity begins at home so all to consumers is where it should be going but you do not give this option. Once again choosing where our money should go. I hope you rethink this model and give 4 options with number four being all to consumers.
Colleen Kirkwood	Option 1	Winter power cost help would be appreciated.
Vale Redden	Option 1	I vote option 2
J P Bermingham	Option 1	by using this option (refund to me) it reduces my monthly account to the same prices as cheaper provider options and saves me changing providers.
Jeni Fountain	Option 2	Happy with the groups chosen in Option 2 to provide additional support to. The cost of our power in general is more than other power companies so my preference is to still receive the extra rebate for customers heading into winter when power is even more expensive.
Gary Prendergast	Option 1	You should have sent a reply envelope so all people have a chance to reply to the options not everyone has a computer. Also the whole amount should be distributed to all consumers after all it is the consumers money. There is far too much money already going out in grants
Bj And De Tregoweth	Option 1	Please have more regard for the consumers who have generated this dividend
Gary Jefferson	Option 1	Things are pretty tough out there for a lot of people so an extra \$295 will go a long way with Xmas just around the corner. An extra \$295 should be paid back to the account holders, after all this money came from them in the first place & a lot of people struggle around Xmas time so will be a huge help for them..
Neil Abbot	Option 1	More should be distributed to customers as everything going up but wages arnt.
Judith Chatterley	Option 1	I believe that eligible consumers should be entitled to a full share of this extraordinary payment and can chose, if they wish, to contribute or donate to any organisation that is relevant to them. As eligible consumers are in fact shareholders the choice should be left to them.
Sheryl Ann Wilson	Option 1	Option one thanks
B. Cassie	Option 1	chose option 1 as we pay enough and its nice to get something back. We donate to charity's of our choice.
Wayne Wairin	Option 1	All money should go to eligible consumers.
K.V. Lay	Option 1	By purchasing power from Trustpower, (one of the most expensive suppliers of power in New Zealand), consumers are contributing to Trustpower's profit, some of which is now available to consumers through TECT.
M H & C Cole	Option 1	The principals of the distribution policy must be maintained. Lessons must be learned from last years fiasco. Trustees must consider providing eligible consumers input into any proposed allocation of Capital from the Iconic Projects Fund. It is imperative that there is consumer/ ratepayer oversight to ensure the fund is not channeled into another Council white elephant. Scrap Iconic projects fund
Simon Meredith	Option 1	would be happier to get 100% of my share.
Kaye Hurn	Option 2	I think option 2 is a fair split.....
Heather Ramage	Option 2	As a superannuitant any extra money assists with home maintenance so my choice is purely selfish.
Caroline Willis	Option 2	My preferred option is Option 2 - second choice would be option 1.
Mr J. E. Pratt	Option 1	As a pensioner, this one-off payment will be very useful.
Gg Hamilton	Option 1	Do not understand what these trust are up too.
D Ohalloran	Option 1	I think by giving it back to consumers it helps the community as the money is generally spent locally, people can spend it how they like without having to belong to a group or apply for money through an organisation. Also a lot of charitable groups use the money for admin or wages of overpaid ceos.
Mel Clark	Option 1	I believe the funds should be distributed in line with the current policy, that has been put forward to TECT consumers on numerous occasions and that the Board are expected to act in accordance with. While it is laudable of the Trustees to wish to assist the community with extra special projects, the funding should come back to consumers in line with TECT policy and provide assistance for all the families and consumers in the Bay many of whom will be facing higher costs across a variety of areas this year.
John Rowley	Option 1	As a pensioner this is the only option I could support
Andrew Robertson	Option 1	\$295 paid into bank please
Julie Green	Option 2	I think it is fair to share between the consumers and the wider community
Tracey Annear	Option 3	I must admit it would be nice to get something from this rebate and I would like to see the transformational grant initiatives get something too..
Mcdonald Family Trust	Option 3	we would like the money to go as grants
N G & C A Mckay	Option 2	With current living costs it will be a big help on the pension .
Colin Halliday	Option 2	I'd prefer a 3 way split option
Colin Howie	Option 1	sounds good. when to happen
John Hayes	Option 1	As a consumer I would like all possible refunds returned to individuals customers and then they can make individual donations to organisations of their choice or choice how they spend the funds.
Murray & Faye Falloon	Option 1	This is the way that the beneficiaries voted for and we still agree with the 80/20 rule
Mr John Daniel Clark	Option 2	We are blessed to be a blessing to others so it is good to share when possible. John
Mark Elliott	Option 1	As a retired couple the extra money is appreciated and we already voluntarily support several charities
Mary Capamagian	Option 1	Consumers can choose their own charities to benefit, if they so wish.
Michael Wayne Matthews	Option 1	WE ARE PENSIONERS AND SUPERANNUATION IS OUR ONLY INCOME WE WOULD APPRECIATE A CHEQUE. THANKYOU
Leslie Goodliffe		Supported option 1 and 3

Helen Anderson		Either option one or option two. However; why the change in amounts, why could you not give the consumers \$295 each and \$4.2m to the charities mentioned in option two.
Mdm And G Batchelor	Option 1	We prefer to make our own decisions about charitable donations.
John Henderson	Option 3	Make a bigger difference sooner
Heather Bernau	Option 2	Option 2. Some reward for customers and a third of the amount will go to charity.
Carolyn Murphy	Option 2	I am very strongly opposed to option 3.
Duncan Counsell	Option 1	This way all parties receive some benefit from the monies available, not just handed out to grants and initiatives.
Forsyth, Alastair John.	Option 1	Now that Trustpower no longer rewards me for giving them my internet costs, and has higher charges than other providers, I want this money before I change both my ISP and power elsewhere.
Tm & Fd Walker	Option 1	Thank you for the opportunity to make a recommendation
John & Glenda Elmsly	Option 1	Their is a further option that you have not provided for and that is to return the total amount to the Beneficiaries and allow them the right to choose if they wish to donate to charity, of their own choosing . please advise what is happening to the payment received from the sale of Tilt Shares . This money should also be returned to beneficiaries .We have no choice but to accept option 1 , we do not agree with the options provided
William Falzone	Option 1	Would like to see all funds go to consumer.
Sandra Davies	Option 1	Eligible consumers receive the full grant and make their own decision.
Barbara Murray	Option 2	My reason for choosing "middle-of-the-road" is because many of your customers are on benefits or are national superannuitants. Managing budgets on these payments has become harder and harder and I feel your loyal customers would welcome a payment in the middle of winter when food and power bills are higher. As I would.
Bruce McLachlan	Option 1	The money belongs to us. once paid out, we can decide for ourselves how we support local groups & our community.
Andrew Mackay	Option 1	I would like to see the carefully selected current grantees enhanced. Thank you for the opportunity to comment.
Eleanor McFarlane	Option 2	I would vote for option 2 and would be pleased to see the Ambulance Service benefit from it.
P A Walsdorf	Option 1	Option 1. If I want to donate to any charity I will do it myself so I can claim it in my tax return. I will give to the charities that I choose worthy. Not what you choose is worthy.
Pam Fegan	Option 3	Put towards new bike lanes to reduce traffic congestion
Therese O'Brien	Option 1	Look after your consumers before you give more away to community groups.
Francesca And Tom Berntsen	Option 2	Fair enough.
Natascha Diggelmann	Option 2	We need more money to go into transformational grants. Option 1 was too vague for me.
Brandon Adams	Option 3	Put money into arts as well as recreation facilities - we desperately need a museum. This growing city needs to have more than a beach and sports venues.
igna Meyer	Option 1	I will choose who I would like to gift my money to.
Kelly Hill	Option 1	The charities I support are not supported by TECT - I would like to have this choice and not have it taken away and made for me
Ggregory Gamman	Option 1	trust power is more expensive , for the consumer, so a full rebate is expected Experience tells me ,(Its not how much you donate, but what you do with it.)Living on a wage is expensive, there has all ready been feedback on the distribution policy.(WHAT PART DOES THE TECT TRUSTEES not understand .
Jillian Jarvis	Option 1	I would want to get the \$295 cheque as this would help me with some bills.
Cindi Feder	Option 1	For families on a lower income this option will make a big difference. Those who can then afford to donate to charity can do so by their own accord. Or if you can make it work that each payment is distributed by what ever option the consumer has chosen then everyone would be happy. Thanks
Neil Shore	Option 1	would prefer 100% to consumers but you haven't provided that option
Rayna Stephens	Option 2	Much money going to environmental issues. No accountability
Alan Spiers	Option 1	I would like to receive the full amount as I have my own charities that I would donate to. Thanks.
Grant Potts	Option 2	I like the idea of funds going to emergency services etc,
Gj & Sm Oakley	Option 1	I question why the current TECT trustees are not prepared to follow through with the policy that is in place.
Coralie Gardiner	Option 2	I think it is a good idea for consumers to get something and also the transformation grant initiatives
Clive And Jeandominy	Option 1	We would actually like to see the full amount distributed directly to eligible consumers.
Pjwatt	Option 1	what about an option to distribute all the money to eligible consumers. you should have offered that option thank you peter
Chris Fitzgerald	Option 1	Option 1. Sounds like a fair option to us.
P M Erueti	Option 1	I prefer Option 1... power is expensive, life in general is becoming far too expensive, this extra money could really be the difference in some dire situations to many families that struggle with day to day living.
L & M Purton	Option 2	I like to choose to which charities I donate to
P. Hamilton	Option 1	I need the money
Kate Lovell	Option 1	Really need the money ourselves!
P J Magnussen	Option 1	Maintain the status quo.
Mrs J M Humphrey	Option 2	Seems a worthwhile mix.
Cameron Anderson	Option 1	Your biggest issue is that you didnt give people the option to pay it all out to the eligible consumers. If you did then you may find that it wasnt the majority option but by not giving the option you have rubbed a lot of people the wrong way and get negative feedback. The board of trustees are distrusted after you last attempt to give away money without all possible options being given to vote on.
Jannette Hardham	Option 2	thanks for asking
Terry Hawker	Option 1	As the amount we pay for power is already among the highest to allow for TECT to pay grants I feel this should be split in the usual manner.
Faruk	Option 1	Big thanks to trust power giving this opportunity. All the best in the future.
Hubertine Maria Jantine Rolls-Pierhagen	Option 1	Although I certainly encourage funds to go back into our community, I have my own preferred charities which I donate to when I can. Thank you!
Dw&Jm Carter	Option 2	Prefer Option 2 but would also be quite happy with Option 1
Sa And Cl Hodgson	Option 1	Option one allows us to choose what we wish to do with our funds, should we chose a charity, the funds will be donated in our name and not the TECT entity. Please note, that as the email address field cannot be bypassed, a non reply email address has been provided so that we can select our preferred option. It should be noted that to demand/force for an email address, that this action is in breach of the Electronics Act/NZ Law.
Vanessa Tait	Option 1	While I appreciate money going to charity I never agreed to my rebate from Trustpower going to charity. If I was given the full amount I would be able to submit a portion of this money to a charity of my own choosing, rather one that I have to give to.
Mark Orchard	Option 3	This money is better used in the community than in Trustpower consumers' pockets.
Kim Mui	Option 1	The extra \$55 will assist with the winter power bill when on a pension.
Jane Dell	Option 1	Enough goes to charities, make Trustpower customers happy by giving them extra rebate directly to them.
Sue Jardine	Option 2	Have selected this option as it helps both community & consumers. Thankyou.
Jose And Michael Mellelieu	Option 2	Thank you for sending the information regarding the one off special dividend.We prefer option 2.
Rex Newcastle	Option 1	Of the 3 options - I want Option1 - the total distribution coming back to those who have earned and paid for it over the years.I want to be able to decide which charities I wish to support with my \$.
Martine And Clinton Bowyer	Option 1	Option 1 and get the \$295
Graham Dixon	Option 1	I choose Option 1, to receive the maximum \$295 consumer rebate
Ross & Jannette Parkin	Option 1	choose option 1 to assist with keeping customer base which is at risk from competition.overcharging and giving back is not a long term option
Christopher Johnsen	Option 1	As a pensioner, I find I need any extra money available. For someone working, and on a large salary it may be different, so please think of those needy Trustpower customers, before you give the money away.
Sandra Braks	Option 1	Is feedback needed when the Trustees are required to distribute this dividend as set out in the trust document, as is their legal obligation? I seem to recall a similar discussion taking place when the Trustees were considering moving away from what was stated in the trust document regarding distribution of funds.
Mervyn Taylor	Option 1	Thanks team, excellent work. cheers
Rm & Sa Hhollands	Option 1	could you tell me why consumers only get 80% of the funds not the full 100% of the one off payment.Kinds Regards Susan & Rob
Derryn G Torrance	Option 1	While I'm community minded and think it's great to help with this extra payment.... I feel that because it's a one off payment why can't the consumers get all the distributions this time.
Glen Harris	Option 1	Prefer all paid out to eligible consumers
Lance Helem	Option 1	Why are you ignoring the previous result regarding this? If you wish to give away your personal money, that is your decision. If I wish to give my money away I do not need you do it for me.
A B & H J Waldegrave	Option 1	Most of the Charities named will still be funded
Graham Macgregor	Option 1	Reducing power costs to beneficiaries should be a priority to encourage consumers to stay with TrustPower.

Gary Scholfield	Option 1	The Tect trust deed places a general obligation on Trustees to distribute the net annual income for the benefit of the Consumers. If the trustees have philanthropic desires they should use their own money. Of the three options given, none give the full 100% as consumer rebates. Why not? Surely this would benefit consumers the most? 100% should be paid as consumer rebates.
Pa & Ki Garaway	Option 1	The Trust's name is "... Consumer" Trust, so distributions should go only to eligible consumers.
Ross Sheerin	Option 1	The rebate should go to consumers, most of whom could do with the rebate to off set TrustPower's higher charges
Sandy Radford	Option 2	I hope emergency services includes St John ambulance.
Caitlin Barr-Smith	Option 1	Would be good to get a breakdown of what option 2 goes towards. Current community distributions have been great.
Telessa Nahi	Option 1	We should be able to choose an Option to have the total distribution to eligible consumers. I would greatly like to donate money to different charities and be given the choice of the charity. We are the eligible shareholders, but with limited options.
Carol Malone	Option 2	\$240 each \$7.35m to grant funds
Anthony And Jennifer Rogers	Option 2	There needs to be some distribution to consumers as after all they created this opportunity.
Irene Ewens	Option 1	I would want the option of the entire amount distributed to eligible consumers only included. I believe it is high handed to not include this option.
Kirstan Alderton	Option 1	Option 1. It is up to us if we want to then give to our own chosen charity
Felicity Robersshawe	Option 2	Environmental Sustainability ACTION and positive community support and devoplement projects key priorities and concerns. Thanks for the option to comment.
Karen Wilson	Option 2	I have chosen Option 2 as I feel that these four areas are crucial for the wellbeing of all Tauranga residents.
Phillip Allen	Option 1	For a Consumer Trust this should be a consumer distribution.
Kathleen Sellars	Option 1	We are the ones paying extra every month so you have the funds so it would be great to get any rebates back thanks!
Jonathan Hope Wentworth Gregg	Option 1	like the funds to go towards community projects, for the city as a whole, not individuals.
J E Buckthought	Option 1	I feel the full amount should go to eligible consumers,(anyone who wants to donate their share could then do so to a place of their own choice) however as this option has not been given I have chosen option 1.
Chris Malcolm	Option 1	I do not like the way that you are removing the freedom of individual consumers to make their own choice in each individual case. Every bodies situation and willingness to donate is different and it should be their choice, not yours. Accordingly I am opting for the choice to receive all the payment and people can donate what they want from that.
Harry Freed	Option 1	I would like to see the distribution of funds kept as is ,i have my own preferred charities which i support with some of my tect funds
Kathleen Wallace	Option 1	Give the consumer a break
Raueka & James Lionel Bates	Option 1	Thankyou
Teresa C Booth	Option 1	Wonderful news. Choosing option 1 because some people need every last cent and some like to choose their own charity. Option 2 would be second choice.
Sheryl A Jameson	Option 1	Using Daughters email to vote as I am not online. Thankyou.
Mr N & Mrs Bignell	Option 2	As pensioners we already give to some charities. It will be very helpful to give to the other charities, also to have some extra money for ourselves.
Christina Guzzo	Option 1	Option one because there are many poor people in Tauranga and this option will help them, thereby helping the community.
Kr & Sm Hampshire	Option 1	The shares belong to the Trustpower customers therefore we believe the distribution should be on the same basis as usual.
Emily Munro	Option 1	Option 1 please. This would really help us out at the moment.
J.K. Granger	Option 1	Trust Power customers should be able to enjoy all benefits.
Peter Mcadie	Option 1	Any windfall should be distributed to consumers. Personally I would like to see the total \$21M distributed
Marie Brown	Option 2	As a pensioner the additional funds would be helpful to me.
Lloyd Dando	Option 1	I would like to make my own choice as to what charities, and how much, I give.
Diane Vpond	Option 1	We would like this money direct credited to our bank account, but you don't have options for this?
Luke Meys And Julie Andrews	Option 3	We dont imagine all consumers will have the luxury of choosing this option, so perhaps each individual customer could choose whichever of the 3 options best suit them.
Nicholas Sanderson	Option 1	80/20
B Jupp	Option 1	I would appreciate as much as possible be allocated to those in need in Tauranga.
D & M Frederickson	Option 1	We consider that option 1 is a very generous contribution to top up current grant funds. Energy costs are always on the increase and there are many customers including ourselves that the \$295 will find useful over the winter period.
James Hood	Option 1	Hi I am retired and I also know a lot of poor families, like me, appreciate the refunds and often that is why they joined Trustpower. Simon Bridges has put a Member's Bill in for hoping for consideration. This morning on TV 1. they interviewed, him and he spoke about inflation has caused problems as wages go up so does their Tax. I think the people generate these windfalls by using power, which has also gone up. Wealthy People love spending other peoples money and may say spend it all. But give back to them and let them chose the charity they wish to support.
Kerri Friar	Option 2	It would have been good to know more about the 4 options that were part of Option 2
Owen And Leanne Lucas	Option 1	People are struggling to pay their power bills and I'm sure some extra money to potentially aid with this would be greatly appreciated by many.
Cecily Horne	Option 3	Happy to receive 'regular' rebate and for this one-off to improve Tauranga community facilities, environmental sustainability, innovative projects, cycle and walk ways. Hope there will be annual one-offs.
Anna Rogers	Option 1	Im one of those customers of limited means. In other words every little bit extra helps, so I am supporting the option that gives me this while also giving a portion to the community.
Bill Anderson	Option 1	will help to pay for coming rate increase
C.Polwarth	Option 1	This special one off payment will make a huge difference to those who are struggling with rising rents, food costs and barely managing to meet day to day bills.
Miss J D Webster	Option 1	2nd choice is Option 2. I have a community Service card so any additional money that comes my way is a true gift and will help towards my living costs.
Penny Merton	Option 2	I really appreciate the clear correspondence you send us. Thank you for making it straightforward, and thank you also for having a good proof-reader!
M. Clayton And H. Jackson	Option 2	Good options, thank you
Sarah And Steve Aldridge	Option 1	We feel this should go back to the consumers that support Trust Power.
S Vanos	Option 1	Many of the charities I strongly support are not included in the significant areas. I prefer to choose myself where I donate
Judy Pullar	Option 1	Option 1 please, which is for the people, people, people.
Martyn Neil	Option 1	Option 2 - I may have agreed to this option but I do not agree with money distributed to First 1000 days of Life and Safe and healthy homes, for numerous reasons too long to go into here. Option 3 - a no for the same reasons as above and also beneficiaries in the third column are not specific enough to make a call.
Mrs J S Van Dyk	Option 1	A big surprise and very welcome. Also good to add to the current grant funds. Thank you TECT
Sue Price	Option 1	Find it hard to make ends meet being pensioners any little extra is a bonus to us
Barry And Julie Webb	Option 2	Emergency services should be funded by our taxes via central government but happy to contribute to this. As consumers, we are also happy to receive some benefit on additional profit earned. Thanks :)
Gary Yaxley	Option 1	"Transformational Grants" is not specific enough to justify giving away money to, could be to some minority splinter group.
Lynn Marra	Option 2	Stop trying to change the distribution of these funds. There should be an option for a 100% option to distribute all to consumers. I would have voted for that one.
Tracey Oliver-Marshall	Option 2	I'd prefer all the funds go to Emergency Services. The grant would have a much better impact if given to one area. Emergency Services are surely deserving of the contribution and we would all see a benefit from it. Spreading the grant thinly over the other areas (First 1000 days, Safe Healthy Homes and ES) achieves questionable, less real results. It sounds more like trying to tick boxes on the "objectives and goals" sheet.
Bruce Trask	Option 3	I will state again, but I would wouldn't I. The bulk of this funding should go to improving our environment and making behavioural changes re Climate Change.
Alois Luttenberger	Option 1	I want the TECT TRUST to be dissolved and support the proposal that came out last year, for a lump sum pay out.
Gj & Ja Brown	Option 1	Many Thanks
Barry Fletcher	Option 2	seems the fairest way

Ivan Hamilton	Option 1	There is no need for this, the status quo should remain. I would have thought the Trustees would have learnt their lesson after the debacle last year. If people wish to give some of their share towards the transformational grants let them do it on a voluntary basis. What's going to be the factors on the trustees decision ,is it based on a small % say in favor of Option2 but equates to only say 15% of the total eligible voters. I sincerely hope not .
Mr Girard	Option 1	We would like the 295 please as we need all the financial help we can get. the 1 big payout mentioned last year would be great for us. David Girard
Wayne Strange	Option 1	Many people, including retirees, are struggling to make ends meet.
Dale Henderson	Option 3	Option 3 is our first choice. Option 1 is second choice, and Option 2 is least preferred option.
Lindsay Cave	Option 1	There should be a third option - all money distributed to eligible consumers and nothing to any other organisations.
Vicki Coe	Option 1	100% should go to eligible consumers for them to determine how the money should be used. You don't list this option.
David Mackay	Option 2	Option 2 seems fairer to all parties
Dannette Lovell	Option 2	Love the 'towards transformational grant initiatives' idea .)
David Marshall	Option 2	Great initiative targeting key priority community needs.
Ashara	Option 2	I would love to receive some money back but also love to see something in the community transform with this money
Denniston & Associates Ltd	Option 1	If one option has to be applied to all consumers then I prefer option 1. However I think it would be better to give each consumer their own choice as to what happens to their individual distribution (as is the case with the normal TECT cheques) - some will have a use for the money themselves and others will want to support the community projects.
Linda Milroy	Option 2	As a struggling one income family I would appreciate some of the funds but also like to see some go to the grants initiatives
Brian Brown	Option 3	Make a difference
Jr & Ca Schwarz	Option 2	all good
Cherie	Option 2	The way you have formatted the above form is misleading. I think there should have been an option where all community projects got a distribution and consumers received around 100-150 dollars, this doesn't seem that hard to me?
Kaye Besley	Option 2	All consumers should receive some of this unexpected amount,
Rosemary Treloar	Option 1	Option 2 is second preference
Ryan Mcleod	Option 2	happy for some to be shared with effective community groups.
Janet And Wayne Eaton	Option 1	We consider that Option 1 is the best option. We are concerned that either of the other two options would require considerable time, effort and money establishing the worthy recipients, whereas you already have a pool of worth recipients that apply through the present grant funds system.
Karen McDonald	Option 3	Do we receive tax receipt
Chris Kenny	Option 2	As a golden oldie any extra income we receive is most welcome.
Angela Liddell	Option 1	Definitely option 1. Thank you
William Friend	Option 2	I feel that you as a group are more interested in the community than you customers. You seem to be trying to be the great dogooders of the bay when in fact you should be the guardians of your customers well being. Bill Friend
Charmaine Kendrick & Dean Barton	Option 1	We would have voted differently if funds were not going to Safe and Healthy Homes. It is the responsibility of the owner to ensure the homes are Safe and Healthy. I would have liked more specifics about who was getting the extra funds.
Richard Eldring	Option 1	Please do not supply my personal info to marketing companies. I would prefer the \$4.2M in option 1 given to emergency services only.
Anna Woolfrey	Option 2	There should have been an option for all funds to go to customers. Given recent history, this omission will undoubtedly cause more mistrust. It looks as though you are trying to be clever again. If I had to pick of the options, it would be option 2 because option 1 sounds too wishywashy and vague and like Blink PR may win lots of work off the back of it ala jazz festival. It is additionally gauling because the reason we are filling in gaps is because of the cuts and agenda under the Blink PR owner's husband's political party. The cost of posting all this info out is also concerning. You should have just nicely surprised us with a cheque for full amount. At the very least the option of paying all the money to consumers should be on there.
Ron And Ngaire Pearson	Option 1	Dear co-ordinator, I wish to present our feedback on the above but first; Please note the linkages to respond appear very poor and inadequate .There need to be more direct /specific linkages that are obvious or intuitive in order to get a full response. It appears that simply getting to the two on line contact points is the only guide and then do your own response. I think you need to have an electronic step by step guide around option choices. To answer the request; We are adamant that the selection can only be Option 1[ONE] which is aligned to the existing distribution methodology. These are the returns ,special or otherwise, that are due to the consumers of TECT . To propose option two or three is to suggest consumers ,who are already under increasing financial pressures ,should suddenly concede all or much additional income to non specific grants . The consumers should NOT be asked to do so regardless of special rebate circumstances . The rebate is not special to grants ;it is special to the existing consumers.
Graeme Faulkner	Option 1	Consumers made it plain before that they are OK with 20% Anyone who wants to give more to charity are quite capable of doing so themselves Stop wasting funds persueing this agenda
David Hall	Option 1	I believe all 21.0M should be returned to customers but this is not an option, is the trust now trying to implement what you were trying to last year?
Jonathan Shaw	Option 1	You should be rewarding your individual loyal customers directly, without having to navigate confusing and potentially difficult websites. The decision to give to charity is a personal one to be made by each customer and not by a blanket corporate decision. It's not rocket science, hardworking people want the money in their own account and then they can prioritize their own spending.
David Lees	Option 1	I need the money
Keith Hart	Option 1	Remember this is not your \$ to be giving away !!
Mp & Rm Welsh	Option 2	Priority to funding for the emergency services.
Dennis Farquhar	Option 1	Eligible customers should receive the bulk of the grant as they are the ones paying for the services.
Karl Stevenson	Option 3	Thanks guys! Keep smashing it!
David Lear	Option 2	I struggled not to pick option 1.
Kenneth Herbert Johnson	Option 1	Without the yearly TECT rebate, I would change power companies as some are cheaper so I prefer to receive the special distribution funds
Harald Staude	Option 1	The TOTAL refund should go to consumers. Charity is up to individual consumers and individual need and ability.
Christine Lee Higgins	Option 1	Option 2 is a close second choice and we would be quite happy if Option 2 is selected instead of Option 1. We don't agree with Option 3.
Colleen Street	Option 2	I'd like you to support NZ Coastguard, Bird & Forest, Rescue Helicopter and St John.
Nadine Smart	Option 1	Option One please
Annabell Downes	Option 2	I would like to see that St John gets a really good size grant
Pauline Tribe	Option 2	good idea!
P A & P E Oellermann	Option 1	In this day and age with the terrible wages paid by employers, sorry but we need anything extra that comes our way. I wish it was different, but TECT already makes generous donations, and we need to live.
Paul Smith	Option 2	It's a lovely idea sharing grants like this with groups we can help
Stewart Henderson	Option 3	A great opportunity to help fund projects around Tauranga, from which we all benefit
Neil C. Munro	Option 1	Being a superannuitant means the option which gives me the most directly makes sense,
Marie Rhodes	Option 2	I want to support the emergency services. Also babies and healthy homes are very important for those on lower incomes.
Sonya	Option 2	If this is an extra little sum of money for the customer that would be great as I know people are in hard times and this extra cash could come in handy but also to give back to the community as well the our emergency services which need a lot of help because they do a awesome job and always need the funding to do so.
John Forrest	Option 1	A larger amount of 2nd part of Option 1 plus the 1st part of option 2 would be better.
Catherine Haerewa	Option 2	With the bulk of the \$7350.00 going to Emergency Services
L. Peter Due	Option 1	As a Trustpower customer I feel we should benefit the most as its really our money or are we just being charged to much
John McClure	Option 1	Prefer to make our own charity decisions.
Ca Heaton	Option 1	We need the money to keep up the inflation, let alone cash rich people do the charity voluntarily.
John Jaggard	Option 1	Give out the full amount to customers to allow them to decide if and to which charities they wish to support themselves.
Peter Musk	Option 2	Option 2, appeals to us thanks
Ms & Bj Jeffery	Option 1	Extra money would be nice
Kitty Saunders	Option 1	Happy to top up current funds as there is always a need for them

Claire Sligh	Option 1	In response to the information sent requesting feedback on how we would like the special payment to be made, I would prefer option 1, thank you. I donate to several organisations and would like to make my own decisions for my donations. I am concerned that the decision has been made to no longer make a cheque payment for the annual distribution; i will not give my bank account number via the internet i.e. the bank account details third option.
Peter Campbell	Option 3	Dear Trustees. I thought you would have learnt from previous experience that most people do not like to be told how to spend their money. So where is option 4 to pay out all of the bonus? Option 4 Pay out all of the bonus to consumers- Yes. FYI- I am not a Scrooge, I contribute to financially charity organisations.
Laurel Betson & Rob Henson	Option 1	WE prefer to give our own donations.
Keith Siewwright	Option 1	We have our own organizations we like to support and will.
Karen Long	Option 1	As we are the consumers of Trustpower the funds should be redirected back to us.
Christina Kelemete	Option 2	We have been seriously thinking about leaving Trust due to the hugely expensive power compared to other companies but this would give me incentive to stay on. This also now has me considering taking on the fibre deal. I do believe money should go back to the customers.
Karen-Anne Hoather & Robert Farron	Option 1	Maintains long term distribution approach which has worked well
F.A.Bridle	Option 1	As I support a dozen charities of my choosing, several on a weekly or monthly basis, and my sole income is National Super, I can do with a bit extra myself.
Rosina Davis	Option 1	I think this money should go back to the people.
Catherine Fletcher	Option 2	The funds paid to consumers is spent in the community too
Julie Pryor	Option 2	Very good community group choices
Anna Beck	Option 3	Option 3. No dividend to consumers. Use all funds for grants
W J & Me Richardson	Option 1	We support option 1 (the status quo) and are opposed to the other two options. If the TECT Directors believe that they should be getting into more "feel good" charities then they should look at reallocation of part of the 20% that they already have a mandate to make decisions about. Further, if they believe that Trust Power consumers should be supporting more local charities then they should first be trying to convince the other Power companies to contribute proportional value, based on the numbers of their customers, to those local charities.
J Rodda	Option 2	Emergency services could also include Surf Life Saving
Valois	Option 1	Option 1 is fair. Thank You.
Glenys Hamilton	Option 1	Thanks.
C Ronaki	Option 1	why do grants have to get a top up, this windfall is part of Trust power over charging consumers so consumers should get it all
Neil Parkinson	Option 1	I would like to see the distribution rule apply to this also.
Leon Minty	Option 2	I'm happy to go with option 2.
Dorothy Mcgough	Option 2	Am all for funding emergency services
Kyle English	Option 1	The extra money would really make a difference for our family this year.
Veren Bartley	Option 1	Happy with option 2 as well. Majority of this money should go back to the consumer
Jacqui Mclean	Option 1	I give enough to charities that I choose.
W.V.Canton	Option 1	this is my rebate not yours and my choice as to a donation
Nyree Hawkes	Option 2	Why doesnt all of it get distributed amongst the consumers. Doesnt part of the annual cheque already get distributed amongst the community organisations that apply?
Ludi Jacobs	Option 1	It's money that I can use for payments or to give to whom I think should receive it. Lower the cost of electricity and internet, then your starting to show what a win, win really is.
Sherald Williams	Option 1	I would like this to go to the eligible consumers so many people, the older folk ,families really do need this top up myself included it would go a long way for myself and im sure other people would agree. Regards Sherald
Craig Wymer	Option 1	the last referendum was very clear that 80% was to be returned to the consumer as they support trustpower and this needs to continue.
Julian Reid	Option 1	The same ratio of 80:20 should be applied as usual i.e. 80% for rebate and 20% for grants
David Duncanson	Option 1	Some of us are renting and every dollar counts. Rebate will be a blessing And help
Sheryl Atkins	Option 1	In view of the financial situation of many in the area and their lack of discretionary income/spending this is the very best option for many who are struggling to survive through the winter months and help cover living costs.
John Pottinger	Option 1	need help with \$\$\$
Mike Cade	Option 1	stop trying to change everything.leave well alone.
Ady Van Der Beek	Option 3	Surf Lifesaving Clubs should be considered.
Marc Bonney	Option 2	We would love to see NZ Surf Lifesaving involved in a major portion of the annual distribution plan.
Jenny Spence		Supported option 2 and 3
R. Hayward	Option 2	Under no circumstances can I support option 3.
Pm & Cj Moriarty	Option 1	Couples with young families budget on trustpower rebates for christmas presents & pensioners also wait & buy something extra with their refunds. People also donate directly to chosen charities.
Malcolm Gibb	Option 1	We were disappointed by the outcome of the proposal to sell some of TECT's investment in TrustPower and TrustPower's part in this outcome.We are not in Trustpower's metering businesses' current plan to install smart meters at our property which means we are unable to change supplier. The TECT distributions are only bringing us closer to the dollars we would pay for electricity over the year to another supplier.
Tracey Ronaki	Option 1	I only stay with trustpower for the cheque.
S T Mckinstry & M F Keane	Option 1	1) The funds belong to the eligible consumer members and there should be an option for 100% of the funds to go to those eligible consumers. 2) All the current trustees should retire at the next election as they continue to see the fund as a charity and not a method of returning profits back to the rightful eligible consumers. 3) It is up to each individual consumer to decide, according to their own needs, how much of their annual rebate they elect to give to charity, not the trustees.
Alan Kenny	Option 2	Spend the 7.35 m well.
David Robinson	Option 2	2 or 3 hundred dollars don't really affect us and as much as we think this is an opportunity to give it all to the community we're aware that this amount can make a difference to some individuals so there should be some consideration there.
Naomi Carson	Option 2	Nice to help community.
Noel Stevens	Option 1	Strongly recommend Option 1
Alix McGregor	Option 1	Living on the pension only this would be a tremendous help thank you
L M O'Callaghan	Option 2	We think Emergency Services and Surf Life Saving should get a good proportion of the grants. Thank you.
Alan Marks	Option 2	I would think that in the middle of Winter a lot of families would appreciate a little extra in the purse.
R L Waren	Option 1	We are heavily taxed in this country and to have a utility company playing god by overcharging for an (nowadays) essential service is dishonest and only puts a heavier load on the poorer people so that the richer can play games with their money. I have trustpower shares and am comfortably off but I have a conscience. Tect policy only raises elect. costs across the country.
Greg And Wendy Scott	Option 1	there is alot of families in our community who could use the extra money at that time of the year.
Edna Seerup	Option 2	I think helping the community is a wonderful idea. However my insilation is well over due for an update & would find the extra money a great help in doing this. Would help to make my cold house warmer.
Nathan Bradley	Option 2	I like the new initiatives and balance with consumer rebate
Peter And Jean Craven	Option 2	Fair to all, given Trustpower customers have enabled this additional payout.
R.V.Hodgson	Option 1	Regardless of what comes from Trust power this is regarded as a rebate for higher power pricing their consumers. If I and others did not receive these cheques there would be more consumers chasing cheaper power prices.
Anne Lawrence	Option 2	I think it would be great for the emergency service to get some extra funding.
Rob Wynands	Option 1	Cash for me is good
Carolyn Melrose	Option 2	This way seems fair, consumer gets something back but everyone helping donate extra funds to important areas such as emergency services etc
Valerie Donaldson	Option 1	Thank you for offering consumers a choice. I have recently had an operation and unable to work so have chosen option 1 as the extra money would help me greatly. thank you.
Reginald Melrose	Option 1	For loyal customers of trust power.this is a must as the charges are among the highest of suppliers.
Nm & H Wilde	Option 2	Seems a reasonable compromise between options 1 and 3 - fair to all parties.
Peter Ross North	Option 2	Emergency services could do with the boost.
Stephen Collins	Option 3	Great oppertunity to make a better Tauranga. But maybe \$240.00 extra distributed to consumers may make a helpful difference to people.
Alan Mckenna	Option 1	Well done. This will give a boost to the Tauranga economy.
Isobel. Tume	Option 1	Sorry, but being on one pension these days, every little bit helps.

Mr T G Price & Mrs R P Van Welie	Option 2	The first option is too airy-fairy and the funds will be not really get to where they should. There is less chance of this happening with the second option, which is why we preferred that. Also we believe in those projects. Surely, you are not serious with Option 3!
David J R Bennett	Option 2	I have selected Option 2 because I consider that the price of power is going to increase in the next 12 months and this payment would help those on fixed incomes (pensioners,beneficiaries). The extra funds to emergency services etc. would be of great assistance to them because of a deficiency in government funding and this special distribution deserves to be shared around.
Tim Shellis	Option 2	stop trying to give all of OUR money away.
M Lally	Option 1	The option for all the money to go to eligible consumers was not offered.Why not. There needs to be more transparency why this option was not offered.It allows consumers to have a say.
M J Firth	Option 1	I prefer to see the funds used for extra special or even one-off projects
Brian Crook	Option 1	Being Seniors anything like this will help our budgeting. Tks
Mike Huymans	Option 1	we are old people struggling to make ends meet, so any help is beneficial to us.
Kelvin Clout	Option 3	I would love to see our community vote for option 3 but sadly many people just want what's best for their own back-pocket. Please make the brave decision! Cheers.
M D Frost	Option 1	status quo why change now?
Kim And Andrew Saunders	Option 1	Consumers should received this fund as the area salaries are not keeping up with inflation and general cost of living. Thanks for the information regarding the special distribution. We would like to feedback that the distribution takes the consumer rebate back to the consumer ie Option One. Most of us as struggling to make ends meet so the extra \$295 will assist.
Julie Carvell	Option 2	Option 2 or 3. Because of funds specifically going to environmental sustainability - desperately needed in the BOP
Glen	Option 1	Thanks for soliciting feedback. Your community work is appreciated, but you also need to keep cadence with consumer wishes. There was a clear preference last year for the funds to be directed to the consumers; Id challenge the need to do it again here.
Robyn Parker	Option 1	I would have preferred a fourth option of the TOTAL amount distributed to eligible consumers and am wondering why this option was not available. I would like to see the total \$21 million given to eligible consumers.
Julie Nyhoff	Option 2	I choose Option 2 ; it seems a fair solution to me, both parties benefit.
Tony Strange	Option 1	It is essential this is paid to eligible consumers. Tect already gives the community more than enough.
Theresa Robson	Option 1	Kind of starting to untrust TECT now....after last year you guys threatening to wind it up...so because of that I will take the option that provides the best for me. Sad really but you brought it on yourselves by this threat...you reap the seeds you sow! and by the way the day you pay the last dividend to us is the day I leave trustpower..No faith in you guys whatsoever anymore...
Ewan Robertson	Option 2	that way we all get a benefit from this windfall thank you :)
Jonny Boom	Option 1	Preference would actually be full distribution to eligible consumers. I dont know why the trustees continue to not consider this to be an option!
P Thwaite & J Ansell	Option 1	consumers pay more for trustpower and have "earn" the distribution. Those so minded may donate to causes of their choosing. No need for an intermediary tect trust.
Br & Ma Procter	Option 1	Normal distribution rules should apply. If you want to change it, I suggest you distribute ALL the money to account holders who paid the original funds to Trust Power. Next time please include account number in your letter with the options.
Leveridge	Option 1	Tick to the first option. Option One
Don Scurr	Option 1	Please let me decide who I give my money to.
L Switzer	Option 1	Option 1 is by far the best option. This helps with my pension. Thank you.
David & Glennis Holfield	Option 1	I would like consumers to receive the rebates
Debbie Cunningham	Option 1	Stick to your distribution policy even though this is a one-off. Its there for a reason. I would rather have the opportunity to donate my rebate to local organisations as I see fit, rather than having it decided by TECT.
Matthew Snookes	Option 1	This would really help our family out. thanks
Steve Wiles	Option 1	There are a lot of people in the community feeling the pinch at the moment due to financial hardship. The fairest solution is to go with option A and they can choose how to use that small windfall for themselves.
Judy Ware	Option 1	Thank you for the choice
Denis Meredith	Option 2	I feel option 2 would be the fairest for all. Option 3 definitely not.
Catherine	Option 2	This seems the best option as it gives back to the customers but also gives to some really important needs in our community - emergency services being the most important!
Kristy Sherwen	Option 1	Would prefer to choose where to donate money to
Kate Bladen	Option 1	Option 1 please!!!
Royce Penning	Option 1	If people who receive this payout want to give it to a club or whoever then that is for them to do.The excessive fee for power is ripping off users. TECT SHOULD BE DISBANDED and the power price adjusted accordingly.
Cyril Hughes	Option 1	I would change power coy but for cheque due to high trustpower charges
Reid Calvert	Option 2	Thank you for the opportunity to provide feedback.
Stephen Lawrence	Option 1	Stop trying to change the current distribution policy. The money should go to the consumers who support Trustpower, which has made possible the investments in the 1st place.
Roland Dumble	Option 3	very sensible option
Ray And Michele Dumble	Option 3	Great idea
Rawinia Taki	Option 2	Option 2 makes perfect sense to me and my family
John Rothera	Option 1	The alternative uses in 'Transformational' and 'Top-up' are too vague to be seriously considered. Besides, Shane Jones currently has a monopoly on confetti money.....
W E & V M Thomson	Option 1	We really cant understand why it has been made so hard to vote onthis unless you dont want consumers to have this payment.We are not all computer savvy you know
Malcolm Southwick	Option 1	The special distribution is from dividends from Trustpower ie excess profits. As our power payments have resulted in those excess profits the distribution should all be paid to consumers.
Michael Wright	Option 1	I would like option 1. But it seems like there should be another option: \$7,350,000 Transformational, \$4,200,000 Top up instead of of just the \$13,650,000 to top up in option 3
Jamie Smith	Option 2	Option 2, then everyone gets something.
Sylvia Guy	Option 1	We like to choose our own charities to donate to.
Robert Shelton	Option 1	The extra \$ will really help some families. Others can donate more to the charity of their choice.
Mr & Mrs J R Greenfield	Option 3	We need to think about the future. It is especially important when Government's all around the world are not heeding the climate change issues as explained by Sir David Attenborough for one.
John Alexandre	Option 1	its fair.and we can spend our 295 as we see fit, part of which could benifit our personal charities.
Ailsa Margaret Smith	Option 2	This would seem to fair to all
Craig Morris	Option 2	Volunteer emergency services such as Coastguard, Surf Lifesaving, and Land Search & Rescue deserve support. I would not support funding going to Agencies who bolster their workforce with volunteers (e.g., Fire & Emergency NZ, St John, Civil Defence) as they are already funded from rates, taxes or levies.
Annabelle Thom	Option 2	I think the 2nd option is a fair way of distribution given the number of households who struggle with high power costs.
Elizabeth Garbutt	Option 1	I am living on 30,000 a year with a hefty mortgage due to permanent sudden in health. If I was still earning as in the past I would pass on to charities. I am grateful for the opportunity to have me say.
B & D Cheshire	Option 1	When user pay is operational surely morally any refund must be rightfully returned to the user. It is users who I've sustainably and save power by using solar etc, lets reward citizens who in area. Rates and S H 2 are a high impact for citizens in this area, good to believe in TECT staying commercially viable!
Melva & Mike Keightley	Option 2	We would be happy with this option.
Steve Nigro	Option 2	prefer the recipients in option 2
Ray Moore	Option 1	I feel that the current distributions to charities, sports clubs and the like is more than generous, especially bearing in mind the stories that emanate from some of these institutions regarding fraud and theft. You should also bear in mind that many of your customers (including us) also donate privately to their selected causes.
M M Sandlant	Option 2	Dont want government to have any thing to do with the distribution or to benefit
Tom Bicker	Option 1	Doesn't even balance out with rate increase, just swimming against the tide
Paul O'Connor		Please advise me why there is not an Option 4: \$21M to eligible consumers (\$368 each). This would be my preferred option, then I can decide what to do with my benefits from being a consumer. Please revert back to me by email. I believe it should be the decision of all consumers when all 4 options are offered for how "we would like to see the one-off distribution"
Richard Bates	Option 1	Personally I think all the money should be returned to the consumers. The directors think they are god allocating funds to various organisations. OK for them they have plenty of money.
G F & B Walker	Option 2	A balanced approach that still achieves something significant for the community.

M Burt & Suzanne Te Kani	Option 1	Happy to include current grant funds in special dividend payment. Don't understand where the mandate to alter distribution has come from. Appears more of the same grant fund money grab from trustees. Looking forward to new election of trustees.
Dave Edwards	Option 1	I'm not impressed with your choice of options to donate to, give people their funds and let them choose what to do with it. Why didn't you make this form easier to find typical hide it away and people might not bother to comment
J Almond	Option 1	Prefer funds go to community groups that are not government entities/funded.
Erni Family Trust	Option 1	Consumers should receive this before any charity.
Christine Giddens	Option 2	Option 2. But would like more precision regarding the 'four significant areas' as the nebulous details given could cover many organisations, some more robust than others.
Nicky Drury		Supported option 1 and 2
Ik Payne	Option 1	As a long term customer of Trustpower I would like the rebate paid to us.
Scott McKenzie	Option 3	Put the funds back into the community per the Trust's mandate.
Adrienne Pulham	Option 1	I would like to give to my things I support not what you give to.
Chris And Tanya Steiner	Option 1	Option 1 please
Robert Westenbroek	Option 2	Best choice.
Tim Conder	Option 2	I prefer the purposes to which the grant is being paid on this option.
Jennifer Slade	Option 2	so long as the money goes to good causes. And is accounted for.
Lance Philip Ruffell	Option 1	Option 1 - one-off \$295.00 special consumer rebate to be paid in July 2019
K A Pym	Option 1	Did you not learn from last year, I like to decide myself how and when, what I do with my money without being told what will happen to it just as the Trust Deed said. Charity begins at Home is worth thinking about.
James Pilgrim	Option 2	Agree with option 2
Tracy Te Whaiti	Option 1	Receiving the full amount and then giving to charity would mean a tax donation receipt so would get 33% rebate. If TECT give on our behalf there is no rebate.
Deborah Lake	Option 2	I vote 'Option 2'.
Diana Kitson	Option 1	Why only 3 options? How about consumers automatically receive their nominated \$295 --- And the balance of \$4,200,000 be distributed between the Transformational Grants and Top up Current Grant funds?
Murray & Jane Hay	Option 3	We like the idea of investing into transformational change, and future generations.
Na & Pm Martin	Option 1	We prefer to choose our own charities
Iris Curtis	Option 1	Good morning. I am excited to see your tect special distribution, and am very grateful to have the opportunity as an 81 year old living on just the pension, to say how much I would appreciate the payment coming to me. Thank you so much. Glad I am with tect!!
N. Paynter	Option 1	I have reservations with options 2 or 3 as they tend to take away personal responsibility.
Emily Belbin	Option 2	I'm keen to support the transformational grants but also to receive a bonus too.
Tim Lander	Option 2	Our family advocate for most distribution for eligible consumers (\$240 amount indicated), with allocation of remainder to 'Transformational Grants' outlined. In particular we would advocate preference for Emergency Services and Environmental Sustainability categories, on the basis the 'initiatives' meant the community providers of such services received actual money granted, not just spent on administration of grant moneys. Thank you for the opportunity to input.
Warren Fitzsimmons	Option 1	We are broke and need the money
Blaise Williams	Option 1	100% of the special distribution should be distributed to eligible consumers. They can decide how to use the funds.
Willie Jarvis		Supported option 1 and 2
Alison Grey	Option 2	I favour Option 2 for this one-off Distribution. It would be helpful to me, to receive some further rebate. I think the Transformational Grants proposals are excellent and I support them, but I don't feel that the Current Grant Funds need to be increased. However the explanations of the Transformational Grants mention only the Western Bay. I'd like to see the Grants also be applied to assist those same initiatives in the Tauranga area as I would think that the same issues apply in the Tauranga area, and there are probably many Trustpower customers in the Tauranga area.
Ron James	Option 2	Option 2 is my choice of distributin of special funds. Thanks
Richard Hart	Option 3	Ticked option 3 so funds can grow for iconic city projects such as regional parks, civic heart, museum/cultural centre, heritage and also Environmental sustainability throughout the TECT rohe.
Andrew Knowles	Option 3	Hi there, im emailing as I would like to suggest some additional options as shown below, of which Option 4 is my favoured option.  Option 4 \$NIL Consumer Rebate; and all the \$21mill granted to iconic projects in the local community (ideally to a new Tauranga Museum).  On the other hand, my instinctive guess is that the majority of TECT consumers will want to receive some rebate, so I would therefore vote for: Option 5 \$250 Consumer Rebate; \$NIL for transformational grants; and therefore the remaining balance to top up existing grants for iconic projects for the local community.  Reasons: I dont support funding for the transformational grants because:- (a) I believe central govt should be providing more to these, and, (b) there are added layers of admin in each of the 4 projects mentioned that will unnecessarily chew up some of the funds.
Irene Horsburgh	Option 2	no comment
Judith And Steve Kilgour	Option 1	Hi, We would like to give our feedback regarding the TECT special distribution. Option 1 is our 1st choice. Option 2 is our 2nd choice. Many thanks.
Trevor Prince		Supported option 1 and 2
Derek Richards	Option 2	Hi, my name is Derek Richards. On receiving this notification, we have come to the following opinion :- We would gratefully accept OPTION 2. We like option 1 but the extra cash goes to the normal current grants [tennis clubs etc]. So have picked option 2 so that emergency services [etc] get the rest.
John Morriss	Option 2	My preference would have been for a greater payout to consumers with a smaller amount distributed to emergency services. Many families would certainly appreciate an additional payment - \$240 almost feels like an insult, but then I guess the decision makers are not in touch with the reality that most of us are faced with.
Maurice P Keane	Option 1	Stop messing with how the distribution payments are allocated. If I want to donate money from my share, I will donate it to whoever I think is worthy.
Doreen Powell	Option 1	We are just as needie as the the grants as a pensioner it is very hard to survive so some should be coming to us as we support your company so now you need to support us
S & R Darmody	Option 1	You will need other choices if you want people to donate money to charity as Acorn does not have a very good reputation.
cm Potter	Option 1	The customer is the beneficiary. It can decide to whom it wishes to donate to, thank you.
Marje Young	Option 2	In response to your request for feedback, I support only OPTION 2. Thank You.
Wilson Orange	Option 1	For the TECT special distribution I prefer Option 1. I am already receiving nearly \$3,000 Income Tax return for the 2018-2019 year, for charity/community distribution of funds, of which I prefer to continue to make my own choices thankyou.
John Hodges	Option 1	Regarding distribution of the one-off special dividend of \$21M that TECT has received from it's Trustpower shareholding, I favour Option 1. I am an 85 year old pensioner, living at home who struggles with ill health and whose wife is, at 82, my chief carer. The rebate would be a great help, especially during the Winter months and I will let you have my nominated bank account by post if/when it is necessary. Trusting you understand my decision and thanking you.
Karen Herd	Option 2	Option two would be my pick
Mj & Bl Norton	Option 1	These options are limited and we do not really support any of them. We would like to once again remind the trustees that TECT is a consumer trust, not a community charitable trust (no matter how worthy the causes are). The current policy of 20% of income to charitable purposes has been mandated by the consumers, ie \$4.2M of this special distribution to charity. We would have voted for \$4.2M to go to the transformational grant initiative - but not \$7.35M as proposed. The TECT trust deed allows for funds to be spent on upgrading electricity infrastructure for the benefit of the consumers - we would like to, once again, remind trustees of this option. This special dividend, in part, would be an excellent opportunity to negotiate financial input to stop the visually intrusive new Maungatapu pylons going ahead and instead have the lines go beneath the bridge, which is said to be the more expensive option.
Murray Stuart	Option 1	I don't need the Trustees to distribute money on my behalf I will donate to who I want. We should be paid 100% of all monies this includes the November Cheque

Neil Redshaw	Option 1	Option 1 is the most reasonable and my preferred option
Dale Mallett	Option 1	To whom it may concern, I am in favour of OPTION ONE.
Ron And Sue Wilkinson	Option 2	My husband and I choose Option 2. We want to make a difference in our community, but we also feel it is fair for us to receive \$240.
Marama Wansbrough	Option 2	I choose option 2 . I would support a vote.
Christie Loveday	Option 1	I would like to opt for Option 1.
Ken Speer	Option 1	I would prefer option 1 of \$295.00 paid to me.
Catherine Geeves	Option 1	We would prefer Option 1, the full consumer rebate.
Louise Elphick	Option 1	Murray and I prefer Option 1 for the special distribution of funds.
Graham & Thelma Jack	Option 1	Option 1 is our approved choice.We do not approve of all chosen options in 2 & 3
Kim Rahiri	Option 1	It would be excellent to assist with the expensive winter power accounts. There will also be the normal distribution funds available charities. I prefer to give to charities, which I do do from my own funds to the charities I choose - hence selecting this option. thank you for the opportunity to comment.
Gail Knott	Option 2	Nice to share money between consumers and the grants programme.
Michelle Wood	Option 1	you should be sticking to the current distribution percentage. not trying to give away the consumer distribution. If consumers want to donate their amount they can do themselves. I feel like you are trying to go down the track of getting rid of the consumer distribution again
Naarah Simpson	Option 3	Our communities need the benefit of the input of this large amount of money more than consumers do
Rod Gouldson	Option 2	My choice would be either option 1 or 2.
Ian Williams	Option 1	This option allows me to donate the windfall to a recently widowed friend with 3 children in need of financial support.
Dave & Nicky Hurst	Option 3	We would like to vote for option 3 please. DP & NE Hurst
Tony Hurford	Option 1	I would like my full payment of \$ 295 ,as a 83 year it will help me pay my bills , so dont give my money away thank you
Roy Robinson	Option 2	I suggest Option 2
Judi Brown	Option 1	We shall choose option 1 thank you. Graham and judi brown
Michael & Valerie Evans	Option 2	Sadly all options are too broad and leave others to decide who gets what and what they spend it on. I would prefer the bulk to go to Emergency Services as then 100% of the consumers of Trust power benefit. It is not our task to support Safe and Healthy Homes or Environmental Sustainability - they are both responsibilities of Government of the day.
Jh & Ec Mccarthy	Option 1	We make donations to emergency services on an annual basis
Carole Long	Option 2	I support the grant initiatives offered by Trustpower but would find the \$240 payment offered very helpful
Alan Shirley	Option 3	However, while fully supportive of your expressed sentiments behind the application of both the Transformational and Top-Up Grants, I suspect the funds will just get gobbled up with little to show in terms of "transformational difference" and "inter-generational iconic projects". And if that happens I'll never vote in this way again.
Gail Wills	Option 1	Who has paid the \$16.8 million dollars?
Mark Mckinney	Option 2	Option 2 better provides a better balance for fund distribution
Mike Ward	Option 3	the right places for the grant to go!
M & R Tucker	Option 1	We'll make our own decision on donations thanks!
Brian & Linda Mccready	Option 1	Without the dividend payments coming to us we wouldnt stay with Trustpower, because of the power prices.
Mg Deal	Option 1	The Tect trust deed clearly states that 80% of income is to be distributed to the consumers. There is no other option.
M Deal	Option 1	80% of this special dividend is intended to be paid to the beneficiaries. Just do what the trust deed implies. Forgive me if I sound frustrated, but the trust deed is quite specific on how to distribute funds. Your last attempt to divert funds from the consumers met with a dismal response at the polls. Many consumers are struggling to make ends meet and any dividend is going to help them. By all means give consumers the option to let their dividend go to TECT, but those that want the dividend for themselves should receive it.
M.Mcavoy	Option 1	I would like to see the results of this request for submissions published
Janet Thomas	Option 1	A lot of people are in need of this money to help pay their bills though the winter.
Kevin Port	Option 1	Here you go again trying to be generous with other peoples money. You seem to have been captured by the charities and forgot who you are supposed to be representing. You should have made it easier to give feedback so you got a truer response and why do you get to decide. A referendum of consumers should be done.
Megan Dromgool	Option 1	Would be nice if this contributed to the walkway along the Tauranga City Waterfront to QE2 Park.
Rosalind Burton	Option 1	OUR MONEY BACK TO US, PLEASE
Jennifer Smith	Option 1	I regard the four significant areas identified by TECT as the responsibility of central government and should be funded by government.
Bruce Malpas	Option 1	I'm not sure that its TECT's role to be "transformational".
Norma Beck	Option 1	As I already give to several emergency services and volunteer in various areas, I feel this is a fair choice.
Maxine C Bastable	Option 2	Emergency Services , First 1000 Days of Life, Safe and Healthy Homes, Environmental Sustainability
Tracy And Nicky Gowland		Supported option 1 and 2
Karen Angland	Option 2	At the end of the day many of us are only remaining with Trustpower BECAUSE of the TECT cheque (and that is marginal). Anything that continues to make that worth it keeps the customer. In this case I think it would be nice to give back a portion but to receive some of it too.
Pa Coleman	Option 1	seems fairest especially for long term Trust Power customers who like me already support others in the community
Gj & Sm Horsley	Option 3	Or in descending order 3,2, 1
Bay Of Plenty Rugby Union	Option 3	Bay of Plenty Rugby support the distribution of the one-off payment to Option 3. Thank you for the opportunity to provide feedback.
M A Selvadurai On Behalf Of The Selvadurai Family Trust	Option 1	1. 'Transformational' is a nice fancy name that has some appeal but WHAT exactly does it mean? 2. I would like to know WHO the beneficiaries of the transformational grants are and how much will be allocated to each of them. Also HOW the beneficiaries will utilise the funds and how will that 'transform' whatever it is that will be transformed. 3. TECT needs to be specific on how the funds will be used
Margaret Douglas	Option 1	Emergency services are high-cost organisations and need adequate funds to cope with existing and future needs. They are trusted. "Potential" transformational grants do not have enough detail for me to be confident of the results of future grants ,And I am 80 and would possibly be able to top up current donations to St John and the rescue helicopter - (or buy steak for a change!)
Mr T & Mrs N Golden	Option 1	We choose option 1. This will be an "incredible opportunity" to make a transformational difference to our bank account. Have any of you had to worry where your money will come from to pay You Trustpower account?
Max C And Robin R Avery	Option 2	We the undersigned TECT eligible consumers, select Option 2 for the distribution of the \$21,000,000 special dividend from TECT's Trustpower shareholding. It seems reasonable that some of this unexpected windfall" as you refer to it, should also benefit some worthwhile community causes, but certainly not all of it, for two reasons:  1. We Trustpower consumers pay more for our electricity than most other electricity consumers in New Zealand  2. If it were not for the fact that we continued to be Trustpower consumers in spite of attractive offers from other electricity providers, TECT would not be receiving this "unexpected windfall".  Therefore, TECT eligible consumers should be by far the principal beneficiaries. PS. It is to be greatly regretted that you made absolutely no provision in your correspondence detailing 2019 TECT Rebate Payment Options for Trustpower consumers who, like ourselves, are not on line, to nominate their preferred option. It is to be similarly regretted that you made no provision for TECT eligible consumers who are not on line to advise you of which of the three TECT Special Distribution Options they preferred apart from listing your postal address. Given that most of those consumers who are not on line are superannuitants without a great deal of surplus money, the inclusion of a post-paid reply envelope would no doubt have got you a great many more responses.
Mr G W & Mrs P A Matheson	Option 2	Just having returned for visiting south I rush this reply to your circular RE "TECT Special Distribution" and now offer our reply. We offer Option 2 as our preferred option of the 3 set out in your "TECT Special Distribution" and thank you sincerely for the opportunity to "Have a Say". Thank you for the opportunity to be involved!
Denys Tomaselli	Option 1	We pay enough for power so the distribution rebate helps to offset the high prices. As far as helping the community goes we should be allowed to donate to those we choose not those chosen for us.
Trevor Gleave	Option 1	I am really surprised that the trustees are pushing out the payout option boat again - given the recent caining they got when they tried the same thing recently. If they are so hell bent on giving money away for community projects then maybe they should set an example and donate their annual "honorarium" to the cause instead of taking off of Trustpower costumers. The idea might be a goer if you got the other power companies to donate an equal amount off their profits to charity works in Tauranga. Then it would be truly all for Tauranga Tauranga for all

Craig Haskell	Option 1	Why is there no option for all money to consumers, since the opposite has been put in (all monies to organisations that are undeclared)? Also, what are these other initiatives? Seems a bit like trustees are trying to syphon funds for their own pet projects (again!)
Gavin Meadows	Option 2	I would prefer to see grants distributed to those who are within the Tect/Trustpower region ie BOP and not Nationally as the contribution would be diluted. eg. you mention "Coastguard NZ" this should be Coastguard Units within the Tect/Trustpower region (BOP).
Paul Hickson	Option 1	Use the method you use for other distributions. Not fair to consumers to rock the boat and bring in options 2 or 3 in this case.
H & P J Sauter	Option 1	no, other than to repeat that I (we) are for option one HS , P J S
Carolyn Gander	Option 1	I would use this towards the excessively high City Council rates
Kevin List	Option 1	All dividends should be returned to the consumer. The individual can then make their own decision as to where donations are to be made.
Devoy Squash & Fitness Centre	Option 3	we strongly support the ability for these funds to be applied to community projects
Joanne Ririnui	Option 1	Why is there not a 4th option to distribute the entire amount to eligible consumers? You have a zero option and so it only seems reasonable to have one at the other end of the scale
Lorraine Dobson	Option 1	Thanks its my money I'll donate it to an organisation of my own choosing
Roy Tallon	Option 1	I'd rather have my share of the Special Distribution and decide myself which charities etc to give to.
Bruce Horsfall	Option 2	Distribute the same as the regular distributions
Ron Sinclair	Option 1	As we are a retired couple & living on the pension every bit of money helps,So it is with sadness we go with option one.
Glenys Chauval	Option 1	being on a pension this would help a lot.
Cj Harrison And Sfm Leung	Option 1	The funds being distributed belong to the consumer and the distribution reflects that people are paying more for their utilities than it costs the provider. Hence the maximum should be returned. In principle we see a problem with utilities which are central to everyones' lives, being sold at a significant profit such as allows distributions like the one proposed.
Peter And Judith Malcolm	Option 3	We are rather tired of TECT funds masking the relatively high prices we pay for power through Trustpower
Murray And Raewyn Mcalonan	Option 3	We have supported Option 3, but it is qualified support. We would prefer to see better balance, say 50:50, between "Transformational" and "Current Grant Funds". Tect has a one off opportunity to put \$21m to good effect and we do not support this money going to "more of the Same" which is implied in the "top up" category. Having said this I have spoken with Paula who assures me that current thinking is to put the funds to Iconic projects and to Catalyst for Change projects and not to "business as usual". She has also given me a good understanding of the nature of projects that would be considered. Notwithstanding the above we still support better balance between the two fund concepts. We do not favour frittering away \$21m by way of very modest consumer rebates from this one-off opportunity.
Tjispitz	Option 2	Option 2
Dipak Dayal	Option 2	I would like to see the \$21m split 3 ways ( \$7m each between option 1,2,3) so everyone gets the a slice of the pie.
Elsie Mary Reynolds	Option 1	I am recently retired. I have been a loyal Trust Power customer for many years. As I now rely on the pension I would prefer the first option.
Dorothy Symonds	Option 1	What was the feedback results on the last one when you were going give us a payout and wind up the yearly payouts
Colin Maunder	Option 1	Community is getting enough. Give to the consumers, many of whom are struggling under massive electricity charges.
Mike Lane	Option 1	A very nice timely payout to us older ones.
Judiann Tapiata-Tokona	Option 2	I'd love to see option 2 come to fruition. it shows exactly what organisations will receive funding.
D & E Walpole	Option 2	TECT should not be involved in constructing buildings, e.g. the building taking up " the green" at the Historic Village.
Bs & Tk Winch	Option 2	Second preference would be Option 1
Frances Monica Ransley	Option 2	My main concern is where does all this extra money come from and why aren't the power charges reduced. It seems as tho its the Trustpower customers who are actually paying for everything even the excess that will be given to above grants.???
Richard Walker	Option 1	Where is Option 4, return \$370 of funds to consumers, I prefer to invest in other charities not listed.
Maxine Costar	Option 2	As we have been loyal customers for nearly 48 years and have not changed we have been a part of trustpower i think option 2 is for us
A.B And C.A Loveday	Option 1	We need these discounts as a consumer
Barry Guo	Option 1	We already have an established distribution policy. Would like to see the trust stick to it until a formal policy change. Please act for you beneficiaries. They can make their own decisions and contributions to the society.
Brian Coates	Option 1	1.The rebate in our pocket is the only reason Trustpower is a competitive supplier to our house. This is under review in our house and I suspect TP will either have to sharpen the pencil or be our ex supplier. 2. The notion that the Tect earnings are for Trustpower consumers is the only notion I support. I think the entire \$21m 1 off special dividend should go to the Tect consumers. 3. The Tect proposal in 2018 that rebates should be terminated with a buy out to consumers was dumped for good reason.Long live the full rebate and stop proposing to give it to non Trustpower consumers.
Andrew Gawlik	Option 1	Super profits from Trustpower comes from captive excessive charges over and above other suppliers. If it wasnt the tect distribution I would not be with Trustpower. Therefore the distribution is only possible due to their ability to overcharge, yet retain captive customers.
Robyn Julie Hacche	Option 1	I would like the one-off payment to 100% to be paid to me so I can spend this money helping my family and my chosen charities.
Jill Austin	Option 1	Option one, I have charities I like to give to. I don't want you to choose where my share goes to.
Margaret Miers	Option 1	If the funds available are from profit made from charging us for power, it should be up to us to decide how to spend it.
Phillip Trappitt	Option 1	I wish to express my serious concerns re the trustees request for feedback on the \$21m special distribution. When the trustees previously sought submissions on their proposal to wind up the trust and settle the trust fund on the charitable trust, I made a submission and advised them that such a decision was illegal ( Beyond their powers as trustees) and a breach of their fiduciary duty to the beneficiaries. I attach my submission for your information. The trustees new request re the \$21m distribution is again of the same nature and anything other than option one in my strong opinion would be illegal.Not only would the trustees be liable for a breach of trust but I read in your job description the you are bound to "effectively manage operations in accordance with the trust deed " placing you in a similar position. My opinion is based upon my experience as a chartered accountant and previous auditor of a similar Consumer Power Trust . The trustees are bound by the trust deed to distribute a full 80% to account holders. Anything else would be a breach of their fiduciary duty and render them personally liable for such breach.
John&Helenbindon	Option 1	we do already donate to several charities of our own choice, and prefer to keep it that way.
Shannon Burns	Option 2	Emergency Services are well deserving of this funding.
Graeme Beaver	Option 1	Stop trying to change the 80/20 split
Jacqui Stephens	Option 3	Happy to share :-)
R & I Humphrey	Option 1	The money has come from power consumers, and should be returned to them. Transformational projects should be funded from taxes.
Watts	Option 2	Iconic project funds and catalyst for change fund sound airy fairy and could mean anything. at least option 2 is clear.
L.Morris	Option 1	Other options very lose and uncommitted as to where and when the funds would end up - smacks of vanity projects of the trustees
Danni Connell	Option 1	If I had to choose - Opt 1. It would be nice to see a better compromise. Consumers would often like to see rebate and those in hardship will always choose this. Could the 21m not be split 3 ways?? I want to support Iconic projects, I love the difference funds have made in the community. It's either 4.2mil or 13,650mil?? I'd like to see some shared with Emergency services - they are essential and in Need! Others under transformational grants I feel are Govt responsibility and there are already initiatives around for these. Opt 1 or Opt 3. Ideally it would be better to split 21mil and see 7mil for each of the 3 categories - Consumer Rebate - Transformational Grants - Top up Current Grants Fund
S J Howe	Option 1	the money belongs to the customers thankyou very much
Brian Sharp	Option 1	The distribution percentages should be maintained both in good times and bad. Unclear as to what would be achieved from transformational grants. As an architect I see many misconceptions about healthy homes and what is required to achieve one. Throwing band aids on existing houses without a comprehensive solution can make them worse. I have seen this happen with many schemes to date. More insulation, decreased ventilation through better sealing increases humidity and fungal growth causing health issues. What is environmental Sustainability but an individuals responsibility.
Jillian Margaret Irvin	Option 2	Seems a fairer option. This way everyone gets something
We & K Rickerby	Option 1	All the money should be allocated back to Trust Power consumers as the money belongs to them. Users need this money for their living costs.
Neil Parker	Option 1	Best to leave the TECT consumers to decide how to allocate their funds.

P.Palmer-Matthews	Option 1	Option 1.... believe it or not there are a lot whanau who could use this money, technically it is "our" money so credit it back to us. We pay an absolute premium for power with trustpower so we deserve "our" money as opposed to distributing it to other organizations all the time. There should be individual letter sent to every customer for November rebate to individually decide "which" organization we want to put our portion too, if I was given a list of 10 organizations, I could decide where my portion went??? If any. I mean honestly look what trustpower charges us for power?? We deserve "our" money back.
Paul And Sue Barnard	Option 2	I believe that we should have the option to do what we wish with this money.
Alan Knight	Option 1	As this is a one off, would be nice for consumers to benefit
Rosemary Roper	Option 2	Not sure why the choices made us choose between the 2 uses if we thought we should get some of the money. Really can the money only go 2 ways?
Cindy Foster	Option 1	Your customers deserve to get the rebate as we are paying a high rate for power in the first place helping to create surplus funds. \$2M is still being shared to the community.
Lloyd And Heather Parnell	Option 1	The main reason we stay with Trustpower is for the TECT dividend. We donate money to charities but prefer to choose ones that resonate with us. Thank you
Jodi Tod		Either option one or option 2
C. Walker	Option 1	Im sure this money would be most helpful to Trustpower customers with their heating costs this winter. 20% still goes to other causes of which I think Emergency Services would be a very good one. The Trustees are probably not in a situation where they cant afford heat in the winter but many are.
Ronald White	Option 1	The options are very limited with 1 & 2 being similar (but different) distribution alternatives. Also my guess is that there will be very few reply's that choose "Option 3" (less than 5% of reply's). They must then choose between 1 & 2. Such would confirm that the 3 Options have not been thought out.Hence do not give your consumers an opportunity to choose between completely different alternatives.
James Butler	Option 2	I fell perhaps grants should have been shared in all 3 options.
S.J. & A Flintoff	Option 1	Option 1. Reason its actually our money and we feel that, thats how it should be distributed.
Lynda & Frank Parker	Option 1	As a pensioners would prefer cash to consumer
Martin And Viv Elliott	Option 2	Enhance and enrich initiatives already underway before expanding to new initiatives. Important to simultaneously return a little to us "shareholders"
Mr.S.A.Wells	Option 1	As I already subscribe to Emergency services and have myself and wife to keep on just a pension I believe those who decie to have more children should look after them as I did mine/
Stephanie Cole	Option 1	Although I would like to see more money go to the community, reality is prices of living keep going up, wheres my income has stayed the same, so any, and every, dollar I can gain back would be if real benefit just to cover the basic living cost. Thank you
Neil Stuart-Menzies		Supported option 1 and 2
D.V.Jack	Option 1	Although I am the manager of a registered charity, I am not in favour of an energy supply company overcharging for its product, only to donate funds to an organization of its choice.
Ian Mathews	Option 1	so we can manage our own finances and give to our preferred charities
Mirjam Van De Klundert	Option 2	The class Iconic projects fund is not descriptive enough, more detail is needed before i would consider that option.
Paula Phillips And Bryan Harvey		Supported option 1 and 2
Darryl Mackay	Option 2	Emergency services constantly struggle with not enough funding - they are expected to fundraise for money they require to operate which should be funded jointly by central & local government. Sadly it isn't. In our ever growing city with evermore constant demands on our emergency services, I feel we should be funding these before Iconic projects and Catalyst for change (who are they???) !!!
Martijn Haitsma	Option 2	Trustpower is not the cheapest option for services and we always incorporated any rebates into our subscription calculations. But sometimes community organisations need larger cash contributions to be really able to buy or upgrade services. So we tick therefore Option 2.
Heather Loughlin	Option 1	Thank you. I really enjoy being a Trustpower Friends member and in particular a great way to save for the Christmas cheque.
Stephen Bunce	Option 1	This feels very much like an underhand way of trying to get consumers to give up their rebate that you failed on last year
Ruth Woodward	Option 1	Thankyou for the opportunity to have a say.
Mrs K A Clayton	Option 1	I prefer Option one and be able to make own choices as to what community services to support we do regulary support charities
Ray Reynolds	Option 2	Please distribute the one off payment using Option 2. Thank you.
Pip Palmer	Option 2	It is great to be able to see money going into our community to help make a difference
Maria Holden	Option 2	I like the recipients chosen in Option 2 and wish to support them.
Caleb Grant	Option 1	Definitely option one please
Vibe Home Styling Ltd	Option 1	Definitely Option 1 thanks!! :)
Stephen Tetley-Jones	Option 1	Id rather see funds going to long term projects
Steve Dyer	Option 2	There should have been an option where all columns received a level of funding...
Anderley Middleton	Option 2	Very cool.
Neil Cudby	Option 3	Great initiative
Lucy Strawbridge	Option 1	We are not a high income family and would find the \$295 very helpful. Plus funding still goes to the community
Sharne	Option 2	Option 1, since iv paid so much in power
Sara Madsen	Option 1	Hi there my family and I would like to see option one where consumers get \$295 and \$4200000 goes to top up current grant funds. This way we can individually choose where to make donations or to keep the funds ourselves if we are in need of them.
John Settle	Option 1	We would like option 1 for the distribution
Odette Bustard		Supported option 1 and 2
Gary Behrend	Option 2	My choice: with difficulty - Option 2 (but with a bit of explanation which follows below) My comments are not intended to offend only to offer my truth I wonder whether they'll be read.  I'm an ex-teacher (English included), but your Iconic Projects Fund and Catalyst for Change Fund€€€€€€€€€€ plus brief explanations mean next to nothing to me. I wonder how much less they mean to other consumers who have even less linguistic command in understanding technical terminology? It's the kind of terminology Councils baffle residents with.  Why, in Option 3 could the Amount for Iconic Projects Fund and Catalyst for Change Fund not be \$4,200,000 (the same as it is in Option 1) rather than the full \$13,650,000 making it a more balanced spread across the board? That would have made a far more reasonable Option to more consumers I'd have thought.
Glen Richards	Option 3	Thank you for your letter regarding the Tect special distribution opportunity. I think this would be a great chance to provide more funding to areas of need in our community. I would not hesitate to vote for option 3. Kind regards, Glen & Minja.
Janice Todd		Thank you for your information on the TECT special distribution. My preference would be Option 1 or Option 2.
Bill And June Soby	Option 1	I prefer Option 1. Consumers can then choose to keep the total sum for their own use or to donate some to charities of their choice.
T & R.Blanks	Option 3	We agree to Option 3 for the special distribution of funds.
Jill Stackhouse	Option 1	My Feed back is as follows - option 1 is the only fair way - its my money after all Trust Power account holder for 20 years
John Jordan Lorna Jordan.	Option 1	We are more than comfortable that the current status remains.
John Wratt	Option 1	It appears we are only getting back what we have been overcharged in the first place. At least you havent given it ALL to the board, directors and executives! The option still remains for those do-gooder consumers to give their distribution to whatever charity they like.Thanks for being honest! ?
Luke Perrott	Option 1	We are struggling to pay bills so the more back to us the better.
Robert Turnbull	Option 2	TECT is marvellous. Keep up the good work in helping the Tauranga Community
Kennedy Pehi-Neho		Supported option 1 and 2
Mj&Wl Spence	Option 1	We've been through all this before. Which part of your previous referendum did you not understand? This money belongs to your consumers to do with as they wish!
E Douglas	Option 1	It's important the payment goes back to the consumers as there are some many people struggling and are in need especially over the winter months
Roseanne Mccormack	Option 2	Emergency services have a horrendous job to do, often their funding from govt isn't enough. They are heroes.
Tanya Gilchrist	Option 1	Want to give it to the charity of my choosing.
Mr M Cooney	Option 1	Thinks consumers should be able to choose their preferred option and TECT action it rather than Trustees deciding.
Evelynn Trust	Option 1	Not happy that the only option was to use a computer to make their choice known.
Rob Tait	Option 3	Great Idea. Look at the big picture projects

Stuart Baker	Option 1	When ever I have considered changing Power Companies and got quotes from Trustpower competitors Trustpower have always reminded me not to forget the TECT CHQ in the comparison and its no surprise that the difference has always been close to that amount which means that around 100% of the TECT CHQ amount is actually my money not yours to throw around .The more you pay out the more Trust Power will pad their charges . The whole thing is a rip off and Trust Power should be held to account or the money should be distributed to the TECT Consumers . I always thought that over time the number of original TECT Consumers would be falling as people got disgruntled with TrustPower and changed companies therefore the amount available for distribution would be increasing per consumer. I have two Questions 1) Is the number of TECT Consumers falling and are these numbers available to the public 2) Was there a legal document created by the TECT Trustees at the time of its creation which clearly states how the income is to be distributed and is this available to the public
Robyn Curreen	Option 3	As we benefit from Trustpower funds as a not-for-profit charity we would like to see as much as possible from this opportunity go to the community directly. Thank you.
Alison R Mcpike		Supported option 1 and 2
Stuart Whitaker	Option 1	I would actually like to see the whole amount distributed to consumers - and this should be one of the options - so in reality option 1 is my second preference
Aw & Lr Reid	Option 2	We think it's fair that consumers get part of the extra distribution.
Murray Hopson	Option 2	Consider this the fairest option for both consumers and the community.
Paul Byrne	Option 2	Please do not phone me.
W A Mills	Option 3	This is a one off opportunity to provide some meaningful funding for the benefit of the wider community
Geoff Andrews	Option 1	The original intent of the Trust should be adhered to.
Ian Turner	Option 1	Maintain policy consistency. Don't like the concept of using TECT to funnel funds into Acorn - nothing against Acorn but it is not the purpose for which TECT was set up, and removes the the ability of TECT to determine where the Trusts funds go. Smacks a bit of cronyism....
Syd Thompson	Option 1	Normal 80/20 spit on all income TECT receives, as per our previously voted on agreement.
Ian Macdermott	Option 1	I would prefer option 4 were I get ALL MY MONEY and give to a project in MY area not ClaytonsCity called Tauranga . BUT that will never happen SO ITS PIE IN THE SKY TIME
David Ogilvy		Supported option 1 and 2
Desmond Godfrey	Option 1	Looks like another trustees on the railway again!!
R N & C A Tye	Option 1	Please DO NOT hand our email address on to anyone else
N.I.Merriman	Option 1	we are not all rich do gooders. I need the money
Regal Automotive	Option 2	We would like to choose option 2 for the special distribution.
Christine Prout	Option 2	I would like option 2. I would like to revive the money for ourselves please. (Sorry but I give, and have given) in my own way). Oh, happy days!
Jocelyn Winwood	Option 1	Definitely option 1 !! Pensioners need every cent we can get these days!
Belinda And Warren Douglas	Option 2	To whom it may concern . We recently received a letter and pamphlet regarding a TECT Special Distribution. I went on to your website to give feed back but it said "site not secure", so we are sending you an email. We would like to go ahead with Option 2, whereby there is a consumer rebate of \$240 and a transformational Grant in the amount of \$7,350,000.
Sandra And Sandy Zaloumis	Option 1	Many thanks for the opportunity of a share in the bonus Consumer Rebate! Wow, that's wonderful and we would like to accept the offer of Option 1.
Alfred Buckton	Option 1	I would like this one off payment distributed as in Option 1
Richard Procter	Option 1	We make donations to a number of recipients, and would prefer that we control who we donate to
Gc & Jh Ward	Option 2	hard to make a decision when one does not know some of the intended recipients
Lynn Rees	Option 1	Should be an option for all to go to consumers.
Murray Bailey	Option 1	\$4.2 million is a good contribution to an ongoing fund for the community. If I knew it would be used for the benefit of the majority and not for an over the top monument of a museum I would have voted differently.
Ruth Mather	Option 1	Definitely back to the consumers. The reason why you have such a big return is because of the customers. So we should be given the majority of it.
D Morgan	Option 1	We should have the right to distribute our funds as we see fit.
Duncan & Glenys Mcvicar	Option 1	If you want to change the distribution plan you should provide consumers with a more obvious mechanism to comment!
Burns	Option 2	It would be good if you defined emergency services, i.e. St John, Coast Guard, Surf Life Saving, Emergency Helicopter, rural volunteer fire service
Tim Johnston	Option 3	Don't understand your terminology as you have not defined what is meant by transformational grant initiatives but agree with more to top up current grant funds, as have said before. As this is a special dividend we think it all should go to community projects as so many largely volunteer groups are in dire need of funds e.g. Papamoa Surf Life Saving Building Project.
Warwick Copeland	Option 1	I do not support some of the groups/organisations in the Transformational grants group
Heather Brown	Option 1	We have chosen to stay with Trustpower because the Tect rebates keep it on a par with other Power companies. As it is the community benefits greatly from the Tect charity so this one off payment should go to the eligible consumers.
Sarah Walker	Option 2	This is a great idea!
Frances Anne Pouwels	Option 1	We can make our own donations with our money if we want to. Id like to see all the money distributed to eligible consumers.
T&C Swart	Option 1	keep current distribution policy
Kim Van Raalte	Option 1	I feel a substantial amount should go towards emergency services in our area!
Colin Morley	Option 2	Option 2 is fair for both.
Kyle Michel		either option 1 or 2, it seems i can vote for both
Virginia Lee Wigley		Supported option 1 and 2
Melanie Lowe	Option 1	The transformational grants were too limited and didn't benefit our family directly. We already donate to emergency services so I would rather have the extra to me so I can donate to something that benefits my 12 year old son. I have the freedom to donate to where it can help our family in a more direct way.
Rodney Bosher	Option 3	St John Ambulance
Jill Glenn	Option 1	I feel that the beneficiaries of the transformational grants are all vitally important organisations that should be supported and fully funded by central government.
H & E Groothuis	Option 1	Need it to pay our winter power bills
Ana Jordan	Option 1	giving to charities is a personal choice and should not be forced on us. Finances are so tight for nz'ers that every penny helps.
Carole-Ann Mountfort	Option 3	We felt that the 2nd option should have included some payment to top up current grant funds as well as the transformational grants. ie split the \$7,350000 between the two
Colleen Pye	Option 2	I would have like to see an option where the split was \$xx eligible consumer \$xx transformational grant initiatives AND \$xx top up current grant funds. This way everyone is happy. And if you reduced your power prices people wouldn't feel as if they were missing out when they didn't get as much Tect chq at the end of the year. But someone needs to stand up to make a difference so good on you TECT.
Mrs A Deacon	Option 1	Conforms to the already agreed 80/20 split. 20% to charitable purposes. 80% to the consumers.
Keith Owens	Option 2	Support shared between consumers and the community
Alan Milford	Option 1	Option 1.Help out customers during winter
Andrew Stuart	Option 2	Only emergency services are really used by everyone. Social engineering is not something that would have universal support.
H J Huizer	Option 3	I feel this is the way to spend this money,for the greater good of the communittee
Sandra Osborne	Option 1	There are a lot of people struggling to pay power bills. I think we need all the help we can get, this would be a big help. Thank You Sandra.
Chris & Carol Waterhouse	Option 1	We would like to see a better selection of recipients that the public can vote on to receive extra funds.
Maxine Watts	Option 2	1&3 were too unspecific.
Jo Willis	Option 2	I would prefer an option where the total amount goes to the transformational initiatives.
Kylie Gracie	Option 2	Option 2
Stephen King	Option 2	As topping up the current grant fund which is already in surplus doesn't make sense to me I support option 2.
Robert McLaughlan	Option 1	I would like to know why you are not distributing the funds as per our annual distribution. Were you not elected to ensure this is how our funds are distributed. You are confusing the issue by going through this three option way of distributing funds that belong to the people of Tauranga. I have chosen one option above even although I disagree with this policy.

Mr J K & Mrs D J Fitzgerald	Option 1	To help cover the increasing cost of power
Alan Bush	Option 2	thanks for the opportunity to provide feedback
Karen	Option 1	option 1 is the only option we want ...thanks
Conrad C K D Hawira	Option 1	I'd like to go with option 1
Stephen Hassall	Option 1	Money saved by a company owned by it's shareholders should go back directly to the shareholder and any charity offering can then be decided by them - Not the company
Krystal Cowley	Option 1	Option 1. People are struggling more and more with everyday living costs so it would be nice for it to go back to the consumers who are paying for the power.
Bradley Kyle Watson		Supported option 1 and 2
Tracey-Ann	Option 1	Special distribution feedback Option 1. I see no other way to cast my vote than this. Why isn't there an option 4 all monies paid back to consumers? Many are struggling financially and unable to access funding from other sources and could do with as much of their money returned as possible. Shame on you for not having the courage to give a fourth option.
Eleanor Esther Mackenzie	Option 1	I am a pensioner and the maximum rebate credited to my Trustpower account would be much appreciated.
Pam Ferguson	Option 2	Option 2 gives a fairer distribution of the funds.
Rhonda Harrington	Option 2	We think this is the most fair option as it helps those of us on a fixed income to cover the ever increasing cost for rates, insurance and general cost of living rises that are occurring weekly.
Mrs Street	Option 2	Would also like to see funds go towards Greenpeace
Tony Ansell	Option 1	I would prefer that the full \$21m be paid to consumers. Why not?
Gary Gempton	Option 2	I would have chosen option 3 but this site differs from the brochure re destination of the fundz
Margaret Leydon	Option 2	I wish to vote option 2
Christine Penfold	Option 1	Allow the individual to decide what organizations, if any, to direct a donation to. There are many worthy causes outside of the Tauranga Community.
Christine Dunster	Option 1	Be nice thank you very much
Martin & Macown	Option 1	We choose option one with reluctance! As the saying goes "charity begins at home" and we need the money. However, it appears to us that your choices are geared to obtain the outcomes that you want. We believe that if we had a true choice we would choose the option one Consumer Rebate together with the option two Transformational Grants. This is because we (the consumer) get the maximum rebate in option one and the option two Transformation Grant names four specific, much needed, community services that you are accountable to and for, ... unlike the option one Top up Current Grant Funds where there does not appear to be any transparency nor specifics. Why is there no option four where the outcome is win-win-win, for all three beneficiaries?!
Karen Halsey	Option 2	There should of been an option for us consumers to have it evenly divided between all eligible consumers. And make it one large lump sum payment and do not have the Tect cheque any more. after all we have been paying for the power, internet etc. It would be nice to have some more benefits
Hitesh Patel	Option 1	When we get offers from competing power companies, Trustpower tell us don't forget the distributions you will get and take this into account. This might be a special dividend but should be handled in the same way as other dividends in terms of distribution - otherwise ã€ who knows how we might look at future offers to change power supplier.
Bd & Lm Guise	Option 1	It should be up to the consumer to decide if they wish to donate to charities and which charities they wish to support, other consumers need this money to help with their day to day living, paying power, food etc so those that can afford to give up their share should not be making decisions for them> Those that can afford it can make their decisions to donate personally but this does not impact on those that can't afford for it to be donated.
Sarah-Jane Odgers	Option 2	Option one or option two
Roger Parry	Option 1	Want to choose Option One but it won't let me
Michelle Nolan	Option 1	I love the grants that help our community but just love the cheque we receive it makes Xmas so much better for our family thank you trust power
Gary Liddington	Option 1	Not polite to say what I really think about TECT gifting MY money to projects that are the responsibility of central government (am I being taxed twice here?)
Mau Arahanga	Option 1	Will were notified about decision via email or will the process just be decided?
Ellen Storrie	Option 1	I want to receive the \$295 payment into my bank account.
Kelvin Roach	Option 2	Would like to see all of the Transformational grant go to St Johns Ambulance service as they are desperately short of funds and they do a great service for the community
Debbie Whittle	Option 1	Thanks.
Kerry & Kathy Snowden	Option 1	Should be another option were all money is returned to the consumer and they can decide on what to do with it
Maureen Argyle	Option 2	I am happy to see money going towards transformational grants
Jeannie Mcnaughton	Option 2	Need more clarification on what "top up grant funds" means. Option 1 would be second choice.
John C Smith	Option 1	Give dividends back to investors.
Jo Veale	Option 1	Kia ora . Thank-you for the options. I prefer to donate myself to organisations that I support. Thanks.
Olive & Graham Caddie	Option 2	Option 2 gives something to consumers as well as providing for some community support.
Lorelle Clark	Option 1	Look forward to payment this will help the household. Kind regards Lorelle
Victor Williams	Option 1	you give enough in funding organizations already. help your customers
Graeme Wilson	Option 2	We need more information about the very broad areas to which TECT is going to allocate the \$7.35 million. I look forward to seeing what is proposed- in detail. Graeme Wilson
Tina Richards	Option 1	I choose option 1 as I plan to leave the area by the end of June. This way I get a payment to almost compensate for not getting the November Trustpower cheque.
Jon Mapp	Option 2	These rebates should go to the Trustpower customers. We all have the option to donate all this money. I don't mind a small percentage going to community. Note that for some poorer families \$240/\$295 will make a huge difference in their weekly budget. TRUSTEES - look at them. Why make them pay for your iconic Museum etc. They won't even be able to afford visiting them. As trustees you should be looking after the interests of all beneficiaries, especially the poorer families. I note - your option 1 gives 20 % to Iconic Projects etc. Why does option 2 give 35% to Emergency Services etc and not 20% also? - not a level playing field! You are picking most will vote for the cheaper option 1. Where is the option to pay out the rebate to customers at 100%? It seems that some or all of the Trustees have an agenda to fund iconic projects that the average resident in Tauranga doesn't want and the council won't fund. It shouldn't be up to the Trustpower customers to fund these projects.
Clint Phelps	Option 2	I believe that this is the best way to distribute the extra funds which have become available thank you for your continued support Regards Clint Phelps
Elaine Fisher	Option 3	I support these initiatives and believe they will make a difference for our communities.
David O'Brien	Option 1	with thanks. O'Brien
Jeffery Burgess	Option 1	I have no comments at this time thank you.
Ms B J A Macdonald	Option 2	I like the combination of a customer payout and 4 identified areas of services which will also benefit.
David Harris Burnett	Option 2	A good system of distribution for a one off grant.
Lisa Te Wheoro	Option 2	What a great idea to have an option for consumers and the community
R N & Mrs V A Somerfield	Option 3	I support Option 3 and think this is a wonderful, one off opportunity to support the very important four areas mentioned with a large amount of funding which if used wisely could make a considerable difference to the operation of these four areas. In a similar way, the distribution of the \$13,650,000 will greatly benefit a wide section of the Tauranga community As a member of the Oropi Community we were very fortunate to receive considerable funding from TECT towards the re-development of the Oropi Hall which has seen the use of the Hall over double in the last two years since the completion of the update. This has really helped to bring the community more together with a monthly Friday evening happy Hour! Bringing up to 80 people in an evening and also a monthly market day. Keep up the great work. Yours sincerely, Richard Somerfield
Shirley Smeaton	Option 1	As per the distribution policy.
Inga Spencer	Option 1	from a humanitarian point, Option 2; but have chosen Option 1 out of necessity to put towards power bills.
Al & Dj Olsen	Option 2	Many thanks.
Graham Wadsworth	Option 1	I would like to give this one off payment to a charity group of my choosing
Wendy Holdom	Option 1	I see it as my prerogative to donate my TECT cheque to a charity of MY choice if I so desire rather than have the cheque taken from me by TECT and given to which ever organisation it deems worthy. It is my money and I see it as my choice to decide what to do with it. I firmly support Option 1.
Lesley Mckenzie	Option 1	Should all go to consumers so they can choose charities or community organisations or at least have a list that consumers can choose who they feel is worthy. Choice is too prescriptive. I personally do not agree with all of Directors transformational grant initiatives. Give a full list that we can tick and issue percentages according to consumer choice. So Option 1 but without top up to current grant funds, instead a list of community services and initiatives that consumers can elect to donate to.

C'Melle Gjiana Isaac	Option 1	I'm a dubious about TECT still having an underlying effort to get more of the consumers money (like the failed attempt last year) and note less than 80% is actually allocated to customers this year. For this reason, I choose Option 1.
Ravinder Paul	Option 1	would be great some extra saving with young family. thank you.
Lorraine Raine	Option 1	I am a pensioner and power is expensive.
Neal Catley	Option 1	Every year eligible consumers provide money, through our Trustees, for grants to the wider community. As this is an unexpected special distribution all of the money should be distributed to eligible consumers.
Paul Washer	Option 3	Provide benefit to the wider community eg Parks/Reserves for future generations
Brian Allely	Option 1	I've done this already, why are you asking me again.
Robin Feron	Option 1	I prefer to give personally to charities etc
Lorraine Carew	Option 1	Our power is expensive so consumers deserve some payment if not all of it. I am getting a bit sick of our do good society.
Paul Hamilton	Option 1	It is not TECT's job to transform major initiatives. Current level is acceptable and more should be done by central and local government
Terence Dell	Option 1	We want to make donations to 'charities' that are aligned with our own philosophy. This is not what frequently occurs with TECT beneficiaries so we'll take the distribution and act accordingly.
Donald & Beverley McInnes	Option 1	look after your customers first.
Helen Weston	Option 2	Fairest to all.
Stacey Hatwell	Option 1	As someone who does there bit for the community and charities when I can, I would like to vote for option 1. It would be a awesome help towards our higher winter heating Bill's and we are trying so hard to get into our first home so every extra we could save would really help
Jim	Option 1	What's wrong with you. You have been told in previous surveys that customers want status quo. Why do you keep needlessly wasting trees, time and funds.!
L M Raleigh	Option 1	This would be a very welcome payment especially at this time of the year.
Mark Weidenbohm	Option 1	The Trustees must never loose sight of the fact that the only reason there is a distribution is because of the profit generated from consumers. Trustpower is not the cheapest supplier and without us consumers supporting them and getting a small return we would seek a cheaper supplier. It is my opinion that all profits should be returned to customers.
Diane Goetzlof	Option 1	Thankyou
Alan Land	Option 1	I would have gone for option 2 if it was going to emergency services only.
Ron Chamberlain	Option 1	Do not pay any money to Governments Responsibilities that have been done in the past
Bridget Weller	Option 1	Some of the money spent in the community seems to be well spent, but some just doesn't make sense, and a lot of what is spent, I have no idea about.
Paul Beveridge	Option 1	There should be a 4th option. All \$21.0M to eligible consumers. This \$21.0M does initially come from monies paid by them with interest received on it and used by Trustpower .
Kevin Walters	Option 2	We do not support option 3
Ian & Jo Dickey	Option 1	We think that there consumers should have a greater part of this one-off distribution. You will still have the normal amount to give away + a bit extra.
Phillip Gallagher	Option 2	Emergency services need help, everyone wins
Kevin Seddon	Option 1	stop playing with our money
Hugh Gardiner	Option 1	I would select option 2 if there was more information available around what constitutes a transformational grant initiative, and the rationale around the selection of same.
Stephen Wheeler	Option 1	You need to remember what the trust was set up for.
Robert Jackson	Option 1	I appreciate the rebate each year, but a lot of us consumers are struggling to exist and pay our power bill, as your rates are higher than others, so any extra money is always welcome. In saying that you are good to deal with, but I do think us consumers should get the best deal.
Joy Bray	Option 1	As rates are due close to grant payments, it would be a great assistance for superannuitants.
R Godfrey	Option 1	The trustees still trying to give our money away!
John Pellett	Option 1	I lost all my savings in a scam 2.5yrs ago. Although my fault I do not wish any money due to me to go elsewhere. You already give money to projects which is not yours to give. Your desires are admirable but your actions are not. Do any of you elected officials give your remuneration away? You were elected to act in our best interests so please do that. If I want to donate to an organisation I will do so but I have given a lot already including giving 10 yrs to the Fire Service. Donations may make you feel good but if the cause is worthy the money will come from other sources.
Mel Carr	Option 1	As a superannuitant I am not in a position to give up the opportunity of extra money to help my budget.
Tracey Wilson	Option 1	Stay with policy and adhere to the Trust Deed. It needs to be understood why the Acorn Foundation is the option for TECT distributions. It appears to be conflicted with the Chair.
J Kernohan	Option 1	I wish make my own decision as to how my money is spent, I do not want Trustpower to do it for me.
Mrs M Trezona	Option 1	If money not put in my account will leave your company. Will be sad to have to do so as been customer here and Whakatane for many years.
Alan & Pauline Lee	Option 1	TECT is a "consumer" trust set up for consumers so please don't keep pressuring consumers to change the status!
Yolanda Cambridge	Option 2	Would like feed back on how those grant initiatives helped the eligible consumers and in what were the out comes.
Patricia Mckey	Option 1	The money belongs to the consumer. If we wish to donate to wherever it should be up to the individual.
Julie-May Pilkington	Option 1	With an income of \$450.00 per week as a caregiver for my mentally unwell son, this money will allow me to have heating over the winter. Thankyou
Melanie Butt	Option 1	As a solo mum this would be a massive help at this time of year
Jason Saunders	Option 1	Although it would be good to go to the community, at present it would probably benefit a lot more "average kiwi households with bills-like mine!
Glenda Gardiner	Option 1	I would like for there to have been another option.....ALL funds paid to consumers and THEY can choose if and how much they want to contribute to community groups. with their money. I would be interested to see the wording of the Tect policy, as I understood it was formed from the former electricity board for the benefit of its consumers, and wonder where the grants to community groups comes into it.
S & J Minnell	Option 2	The majority to the Emergency Services
Brett Steele	Option 1	I would rather pay money to charities myself as at least that way I get to choose the charity and can claim it off my taxes then potentially provide even more. If there was an option to get the lot I would take that!
Cathy Donnelly	Option 2	Keep up the good work guys!
Russell Mckenzie	Option 2	Brilliant that you can do so much with these funds! Keep up the good work, and thank you so much for the very helpful distribution!
Harry Snell	Option 1	While the TECT's intentions are honourable it should remember that these funds are ultimately generated by the consumers who pay for these services and it seems appropriate to me that majority of these funds should be returned to the consumers who can then determine how to best use them.
Craig Dickinson	Option 1	The main reason we stay with Trustpower is to receive this payment each year. Think about people without the financial means of your board, this "cheque" is the difference between christmas and not. While Im at it huge numbers of consumers DO NOT have access to email/computers/internet. Stop and think about your community please
Dennis Pointon	Option 1	Most retired folk would welcome Option 1 especially those only on National Super .
Rj & VI Gillbanks	Option 2	Option 2 strikes a nice balance between a return to customers, many of whom would benefit from it directly and a contribution to the stated transformational grant initiatives - which we endorse.
Ann Thompson	Option 1	I appreciate that the money could make a difference to the community, but there are a lot of people who will be eligible for this who also really need the cash (especially in winter)
L H De Kleijnjen	Option 2	We like this good news!
Martin Tucker	Option 1	Give me my money, please.
Joy Turner	Option 1	Helps offset expensive power accounts, our rates can take care of the other council wishlists. Stay focused on core business instead of warm fuzzies
A M Tucker	Option 1	Give me my money, please.
Bw & Pn Christian	Option 1	Would prefer 100% return not 80%. Costs are rising so fast charity has to begin at home for those on fixed incomes
Jg & Hj Heaphy	Option 1	All one off funds should be distributed back to eligible consumers & none held back. Would be nice to help reduce personal debt for most consumers living in this over priced location.
R Underwood	Option 2	If there was a ranking I'd choose Option 3, then 2, then 1 but have voted for 2 as this seems to be a 'First Past The Post' approach.
Maree Pollard	Option 3	Such an opportunity for the little bit that we would get to be a big bit for the community.
Renee Broughton	Option 1	You could have given more realistic options that split money across all three
H J Mestrom	Option 1	Be good to get some of the money back that you wasted on the last idea you came up with re-selling trustpower/tilt shares !

Gray Southon	Option 2	A difficult set of options, I would have liked an option between 2 and 3.
Bronwen Parry	Option 2	My preference is funding to St John ambulance and the Westpac helicopter
Gino Nepomuceno	Option 1	Option 1... customers deserve a good payout for a change to help though wintwr months
Keith Schofield	Option 1	Consumers are the no1 priority, their business is the lifeblood of trustpower.
Jeremy Meikle	Option 1	Trust Power is the most expensive but this is offset by the refund.If the refund is not available will change provider.
Ms .K.J.Farac	Option 1	Option 1 .some people may not need this but to some of us its a bonus
Julie Bond	Option 1	We would like option 1.
Dave Burnett	Option 1	I could not see on your website any further explanation of each of the options. All options need to be more specific on actually what this money gets spent on. The description of each option is too generic and needs to name projects that the funds will be spent on.
Paris Williams	Option 2	Option 2 is our preference
Diane Martin	Option 1	As a pensioner I find any extra funds a great help. My husband and I do a lot of volunteer work in the community and this will help with milage.
Viktoria Ermes	Option 2	Hi there, option 2 is the only one that aligns to a certain degree with what the Bay of Plenty needs. The first option is a mix of two very different funds. We would love to support funds that support social change, but not so called iconic projects such as Baywave. Why are they packed up in one package? True iconic projects would be different if there were any. I would like to see a multiple choice version of selection what I want to fund, e.g. chose the amount of money I want to fund and in the second step choosing which organisations, funds and programmes I want that money to go to. This is a simple process and if set up properly you will end up with a list of the exact amount of money that can be given to chosen funds. Many thanks
Colin J. Kepple	Option 1	Is Trustpower Account No. the same as "My Energy Number"?
Jane Clare	Option 1	As per current Trust Agreement
Eddie Donnelly	Option 1	Some of the transformational areas should be and in some cases are already covered in my tax .
Phil Borrie	Option 3	I would prefer that the money goes to the community. It makes minimal difference but a huge difference to different community groups who can provide services to those who really need them
Janet & Robin Bramley	Option 1	My opinion on the windfall to TECT is that we should get a bonus as well after all we are all consumers as well and should be entitled to a share.
Adrian Lawrence	Option 2	I like the fact they helping Emergency services, 1st thousand days of life and helping with the Environmental Sustainability.
Pj And Mj Mcdonald	Option 1	will make community donations from this rebate
Ann Clarke	Option 2	Special distribution is greatly appreciated.
R A Cachatoor	Option 1	most of us are the charity
Fiona McClure	Option 2	Thank you for asking for feedback. The transformational grant initiatives are much needed.
Louise Peters	Option 1	To help with my rates.
Mr K R & Mrs B A Woods	Option 2	Would like to see a grant towards home insulation.
Ryan Plank	Option 1	The full Amount should go to eligible consumers.
Gillian Brown	Option 1	TECT = CONSUMER Trust.
R.A. & N.I.Felton	Option 1	We have recently moved to Auckland and are due to pay our final account to TrustPower on 13th May so we qualify for the distribution. We have selected Option 1 to offset some of our moving expenses. We will set up with TrustPower for Tect to pay the rebate distribution direct in to our bank account. Thank you. Bob & Norah Felton
Peter Gregson	Option 1	Firstly I believe this consultation has been communicated badly and that many people will be confused with receiving two sets of Options 1,2 3 at the same time (Rebate payment methods plus Special Distribution). Secondly that to propose \$7.5 million spread over perhaps 12 initiatives and 5 years doesn't seem likely to be transformational. Thirdly, to only have "potential" ideas on which organisations this might go to suggests a lack of clear plan which raises doubts.And lastly, the fact that some of the listed potential recipients are government funded organisations doesn't fit with my ideas on where this sort of funding which is essentially a voluntary donation should go. For these reasons I have selecting against the so called transformational grants and would rather make my own personal donations directly.
Karen Toner	Option 1	Unfortunately as a superannuant every little bit extra counts to live on.
Ngatai Kingi	Option 1	Where is option 4 where we make our own decisions on where the money goes to?! Where is the option where nothing goes to current grants, nothing goes to transformational grants and the money goes to the consumers. Haven't you learned anything from the last time you tried to cheat us? Bring on the elections
Sharon Coughy	Option 2	I would like to see some money come back to eligible customers as a sign of thanks for our loyalty, but then the emergency services which us TECT Helicopter get a healthy donation.
Joshua Seabourne	Option 1	I think that trustpower consumers are in the best position to see the need in their own communities and therefore, if the full amount is distributed this will allow them to do this.
J.E Roadley	Option 2	My Preference is Rescue Helicopter ST Johns Ambulance
Stuart Morrice	Option 1	Getting the extra money would be a great bonus to allow me to fix up my roof
Rachel Falconer	Option 2	i would have selected a 4th option of: a payout to eligible consumers of \$200 each and splitting the remainder between both transformational grants and top up current grants then everyone gets less but no group is excluded.
Leanne Annear	Option 1	We give to Charities in another way, and being on a low income need the money for ourselves.
Brent Bowman	Option 1	Why is this the second time I have received this email for my feedback? What happened to the feedback I gave last time?
Angela Mallard	Option 1	trustpower rates are higher than other power company so any refunds should come back to the customers - no brainer
Lesley And Peter Stevenson	Option 2	Dear TECT, In regards to the one off payment. We vote for Option 2. Reasons 1.We wish to support the Charities that we want to, not the ones you decide for us. 2. It is not a very fair arrangement to give away our money - How come only the Trustpower consumers pay to these charities. Why not all power consumers??
D & Fk Louwrens	Option 2	Thank you for giving us the choice
Jim Barnett	Option 2	My preference for the \$21 million special distribution is option 2. This allows the rebate we receive to be given to charities or projects of our choosing.
Clive Patching	Option 2	Of your three options I favor number 2 .However funding into the cities roading infrastructure could be more prudent.
John & Yvonne Tarrant	Option 2	With regard to the TECT one off special dividend distribution, I would like to see option 2 used for the method of distribution - Consumer Rebate \$240, Transformational Grants \$7,350,000
Ross Walker		Do not like your scam to down the costimers ! You are killing the goose that lays your golden egg ! So I totally am against the paying your thrusts a little to get more
Peter Mckenzie	Option 1	As we pay a premium for our power from trustpower Only those contributing to Tect's income should be eligible to receive any grants
Peter And Josephine Burrell	Option 1	We believe all excess monies should be share between the customers, who have been overcharged for their business. Not given to others who don't contribute. While I would appear to be miserable,a lot of the money paid out is because of higher pricing of energy to customers.It is only fair to return it all to the customers.Not everybody agrees with all the projects supported by TECT.
Accurate Weighing Ltd	Option 1	This is our money that Trust Power have overcharged us to obtain,now you want to give it to someone else
Wayne Mansell	Option 1	Hi there, I would like to vote for option 1 for the upcoming special distribution as per the recent information you sent us consumers. Thank you for the opportunity to vote. Regards, Wayne Mansell.
Ms K Latimer	Option 1	TECT should have sent out paper voting papers and stamped return envelopes to ensure a better return from customers
Jean Sims	Option 1	I think the total rebate should be distributed to consumers, surely the vast majority are quite capable of using money sensibly. Why wasn't that an option?
Debbie Walker	Option 1	We are the shareholders and some of us struggle to pay our bills. Some of us don't benefit from funds shared with community groups so would prefer the cash in our pockets. Thanks.
Rosalie Smith	Option 2	I prefer Option 2. For myself, I would be happy with Option 3 but, with the hardship so many are facing, distributing some of the extra funds to consumers seems a better choice.
B A Hennessey	Option 1	The money should go to the consumer - that is why we stay with Trust power
Maurice Pohatu	Option 1	Thank you very much
Coralie Nicholson	Option 2	Sounds good. Would be lovely to receive.
Kylie	Option 1	there should be an option for all the money to go to consumers
Keith Howie	Option 1	2nd and 4th Transformational Grants Initiatives duplicate existing services and have poorly defined objectives.
Ross Milne	Option 1	A dividend is a dividend. The Trustees should retain the same basis for distribution and not use this as a means of reintroducing what was rejected earlier.Personally we will continue to make payments to local Charities as we support and including using funds from this dividend on the same basis.
David Peters	Option 3	More needs to be spent on saving the environment!
R. N. Bidlake	Option 2	I think the money would be wasted in option 1 as this has happened in the past

Brenda Mareroa	Option 2	A suggestion for funding would a generous financial contribution for a Museum in Tauranga as this has not got anything to do with rate payers but more with consumers who are not rate payers
Marie Abbott	Option 1	I have chosen option 1 because, in the information given, there has been no explanation of what the Iconic Projects Fund or the Catalyst for Change Funds are composed of. that is, I have no idea what organisations would be receiving funding. Therefore I am not confident in having funds allocated to those funds.
Brett Wilson	Option 1	As shareholders, I think money distribution is up to the individual to choose what they want to do with their own money
D & J Devine	Option 1	The funds need to be distributed as per the standard agreement. There are many families in the community who are struggling and this additional payment to assist with winter power bills, warm clothing, food etc will help ease the burden. If consumers wish to donate this special distribution they can choose to donate to a charity of their choice as there are many needs in the wider community and some are more personal to individuals than those suggested by TECT Trustees.
Bj&Ra Chantler	Option 2	We like option @ as the \$240 helps toward the power bill and it supports important services
Garry Fitzwilliam	Option 1	Charity list too generalised. Consumers should have been given a choice of specific projects grounded in practicality rather than aspirational vagaries. Its not your money after all !
Colin Simpson	Option 1	My preferred option is Option 1, I can then give my support to who I want.
Dean & Michelle Rivers	Option 1	In response to the TECT Special Distribution Options I would like to register my preference as Option 1 please. We support numerous local charities and causes throughout the year and would prefer to have the option choose how we allocate our consumer rebate.
Marian Young	Option 1	I object to making donations to causes that I have no information on
Stewart & Ailsa Ritchie	Option 2	We feel that the bulk of the money should go to people who are customers of Trustpower, many people and groups who benefit from the grants are not customers therefore don't contribute towards the success of the company. However we like the idea that the four emergency services stated in the options will be helped so we are happy to take the second option.
Sandra Bridgman	Option 2	I particularly wanted Emergency Services to get some funding, so chose that option. Thank you.
Graham Woodhead	Option 1	OPTION 2: Government should be supporting these groups. OPTION 1: Recognises the amount customers have contributed through paying power bills!
Rebekah Webby	Option 1	There is a reduced payment to consumers this year and it would be great for additional payments to be made to people when there is not a great deal of money available during the winter.
Lisa-Marie Paretovich	Option 1	I am in favor of funding for first 1000 days and emergency services and anything to do with making it possible to buy a home and sustainability however with the Cost of Living so high my family need every and any extra monies possible. nga mihi
Jan Nicholson	Option 1	Thank you for asking for our opinion. We support the existing method of distribution.
Mrs M B Jones	Option 1	With the cost of electricity going up every winter this would be a great help to lots of families
Wendy Parr	Option 2	A Better option would have been say \$200 consumer then some to both the types of grant fund so all parties got some. sad
E.G. Jaine	Option 1	TRUST POWER take the tect money from the customers by stealth...Via the elevated pricing schedule....The trustees were right with their 2018 proposals to distribute....Any windfall should go to the customers / beneficiaries where it belongs
Pb & Hm Archer	Option 2	We and no doubt many Trustpower customers already support a number of charities, and many customers may be struggling to pay their power bill despite the government winter grant.
Michelle Elborn (Bay Conservation Alliance)	Option 3	As a special dividend, I think this presents a unique opportunity to support some exceptional community outcome opportunities for our region.
M Thompson	Option 1	I believe that any and all disbursements from TECT should be as originally intended and agreed to from the inception of the trust.Thanks
MJ & Tj Way	Option 2	Thank you for giving us the opportunity to have our say.
Rob Paterson	Option 1	Full distribution should be made and should not be pandering to charities over and above present 20% allocation.I thought consumers had that clear to Trustees on last years fiasco..if people do not respond then by default the status quo in Option 1 must be allocated as their choice.
Graeme Clark	Option 1	The only reason we stay with you is the top up cheque each year as you sent the cheapest just that I have done anything about changing BUT if the cheque isnt there anymore I will be looking at our options, minimum option 1.
Megan Johnston	Option 1	The cost of living is very high and we could all do with extra help to pay the bills and stay warm over winter. I stay with trust power only because of the rebates if this goes I will seriously look at another cheaper power company.
Penny Stockwell	Option 1	I am on a low income and would appreciate the extra grant to help pay essential bills.
Arthur Atkins	Option 1	Nice for us to be able to give our view on the options available. Well done.
Barbara Patsy Walls	Option 1	I think faithful customers or Trustpower should benefit as well as current grant funds.
Lorraine Putze	Option 2	many thanks for allowing choices
Kyle Beetham	Option 1	The purpose of TECT is to protect consumers from high energy prices after the privatisation (theft) of the energy producing assets of NZ. TECT Trustees should be focussing on making energy in the bay affordable through the ownership of Trustpower and the representation TECT has inside Trustpower. As shown by the failed TECT proposal most of the trustees cannot be trusted to act in the best interests of the beneficiaries they are paid to serve. If there is any spare cash you should spend it on an independent review of the TECT proposal and request recommendations to ensure that TECT is protected from future attempts to destroy the trust.
Teresa Brown	Option 1	Family of 7 young children, we genuinely need this money as much as any charity does this year.
Pj &Ej Magill	Option 1	We would prefer to get the whole refund back to us. We reluctantly agree with option 1. A lot of your consumers rely on that money to see them through a busy time. We have paid for the power throughout the year and are entitled to it. We support charities of our own choice.
Neil Percival	Option 2	Transformational Grants need to be strictly for capital projects. I couldn't think of a better transformational grant than to grant the basis of a museum for Tauranga.
Tauranga Boys' College	Option 3	Our view is the distribution should be used to provide the greatest possible benefit to the wider community.
Vicki Wain	Option 2	Option 2
Harry Bold	Option 1	Thank you so much for your reply.
Joan King	Option 1	As a superannuitant I feel we need to get some more money coming back to us as Trustpower is way dearer than any other of the companies so if we didnt get something back then it would be time to jump ship.....
Dianne Ward	Option 1	If consumers receive this larger payment, they then have the CHOICE individually to donate to where they wish.
Edith Rae Loveridge	Option 1	Consumer input consumer gain
Gaynor Hill	Option 1	Ideally I would like all funds to be returned to consumers.
Bevin Pratt	Option 1	Option 1 distribution as we have said well before 80% to consumers and 20% to grants how many more time do you need to ask this question. I don't care who you decide to grant that share to
Phillippa Cox	Option 2	It would be fair to share it between consumers and grant initiatives.
Jo Birtwistle	Option 1	Give each consumer the option to donate themselves as they will then get the tax benefit of providing a donation
Brenda De Beer	Option 1	This is the best power company that thinks of his client
Wendy Palmer	Option 3	Particularly keen for environmental sustainability over all else.
Keith Walter	Option 2	AS this is just another surplus as a result of overcharging customers, distribution should follow the standard procedures
David Stewart	Option 3	it is fantastic to see this community benefit from initiatives such as these from TECT, thank you all!
Paul James Forster	Option 1	I would have preferred the option of the whole payment being distributed to TECT consumers. This option 1 is the next best for my situation.
M F Rundell	Option 1	Thankyou for this one off bonus
Artastic Ltd	Option 1	Thank you for this extra bonus.
Holly Goldsworthy	Option 3	Thank you for all you do.
Darren Cornforth	Option 1	i can make my own informed decision on organisations to support
Jon & Judy Clark	Option 3	Community needs this money more than us
Mrs M.Wilson	Option 3	2nd choice would be OPTION 2
Glenn Batten	Option 1	i can only speak for myself but do believe most people i know would like to have to extra money...for a few its not alot...for most its alot & will help run the home
Paul Hodson	Option 2	I think this provides a good balance between the consumers and the Tga community
G & SK Fisher	Option 1	Though one would like to be generous, life is touch on just the pension, hence option 1
Jan And Peter Donaldson	Option 1	We prefer option 1 but would like to know precily what you mean by Iconic and Catalyst funds.
Ivan Fay	Option 2	If I need to put my account number on the feedback form Trustpower should put my number on your letter .
Quentin Smith	Option 1	I believe that TECT customers should get the maximum permitted consumer rebate. The individual or entity receiving the rebate funds is then in a position to make a donation to a specific charity or community organisation of their choice. Trustpower consumers should be able to support their preferred community group rather than organisations selected by TECT Trustees.
Monique Merrilees		Supported option 1 and 2

Mrs M Begley	Option 2	Some customers find rebates helpful because of their own circumstances and this one may be particularly helpful going into winter. Some customers may be involved in a community project or charity they may be able to which they may wish to donate their rebate.
Teresa Strange	Option 2	This way all Trustpower consumers get a rebate plus money still goes towards projects that are important to our community.
Roger Stiles	Option 3	The more people benefit the better
Amanda	Option 1	Give it all to the consumer !!
Wayne Oliver	Option 2	Consumers are paying higher power accounts through Trust power than through other electricity providers and deserve a large portion of the total Special Distribution - if not all. However I like the opportunity to support the four areas noted that the transformational grants would be dedicated to and agree that would make a difference in the community over many years.
Paul Callinan	Option 1	I think Tech does a great job in the community, but also feel consumers need a little help sometimes, so I have ticked option 1. Thanks
Zoe Ellett	Option 1	Stick with your existing distribution policy and provide option for customers to make an individual choice re donation to other causes similar to how to you are running the annual distribution process.
Irene Wallmannsberger	Option 1	Individuals can do their own due diligence, direct donations to projects that are beneficial and relevant to their area and activities.
R H & E M Reid	Option 1	We already as individuals contribute to several community groups
Anne Warren	Option 2	I think option 2 seems a fairer distribution as it benefits the community directly with a consumer rebate especially coming into winter. It also provides specific support to essential community services.
Donald Webster Sewell	Option 1	How about stick to your duty under the Trust Deed instead of continuously trying to alter the task you were given. If it doesn't suit the current elected Trustees then resign and the consumers will elect a replacement.
Deon Johnston	Option 1	A 4th option to have the full amount distributed to eligible consumers would be great, especially going into Winter when some could benefit from the extra bonus.
Andrew Hollis	Option 1	It is extraordinary that again the board thinks it can steal this money from beneficiaries. This is not for the wider Tauranga. Its time that the board did what the trust deed states and stops trying to take charity decisions from its beneficiaries. I'd even go as far as stating that in the case of a special distribution the complete amount ought to be redistributed AND another account opened with the individual option for donations to be retained
Natasha	Option 2	Give some money to the community
Don Schwass	Option 2	Thanks for your generosity !
TJ Scott	Option 1	Maximum benefit to eligible consumers should be priority, not playing philanthropist with extra income.
Sam Marshall	Option 2	Option 2 thanks. Not enough detail on option 3 and option 2 provides a good balance on reflection.
Sonia Hoyes	Option 2	Not a lot of difference per individual consumer re payout between option 1 & 2 but a lot of additional funding using option 2 for grant recipients.
Bruce Trust	Option 2	I hope to see Surf lifesaving, Coastguard, Life Flight and St John receive a significant donation as we the community all have the potential need of their services. The many other causes and charities require money but I suggest these four charities service more of us.
Fraser Benton	Option 2	Keep up the great work!! you're all Awesome :-D
C Bates & D Bowman	Option 1	Thankyou
Elizabeth Howell	Option 1	Charity begins at home. Thank you.
Steve Williams	Option 1	\$55 might be loose change to those on good money, but to those of us on the minimum adult wage it is a significant amount and would be better off being part of my budget.
Ant Smith	Option 1	Option 2 please a fair and even distribution of funds
Nadine & Nathan Parata	Option 2	I could be more interested in option 3 if i understood what projects and initiatives were being considered. (inc timelines and project owners)
Suzanne Lawson	Option 2	As I have been approached by TECT Rescue Helicopter Service to donate money I would like to see a large portion of this special distribution go towards this life-saving community service
Karen & Hopi Tairi	Option 1	We think that it should be the consumers who receive the payment, as power is getting more expensive all the time, we help make the profit so why should we not get some benefit enough already goes to charities. It would help our young families & older generation as many of these people are already struggling. Not all of us have plenty of money to not have too worry about where our next payment for our power & living costs are coming from & at times it is nice to have a little help we do not have to pay back. People are important.
R V Anderson		Attention TECT Trustee Committee, You people are Unbelievable ! The Special Dividend of \$21 million belongs entirely to the Beneficiaries of the Trust, not the Committee. While there may be an arrangement that the Annual income (earnings) are currently split 80/20%, this is not a Rule, but is tolerated as being an affordable deduction. There is no Precedent for the current 25 cents per share bonus payment, which we note was announced by Trustpower in November last Year. Nevertheless the Committee have taken all this time to come up with (only) three options for the disbursement of the windfall profits, none of which offers to pay the Trust Members the full amount of their due Dividend. It seems the Committee have not learned much from the previous uprising resulting from their devious plan to embezzle income due over the next 85 years or so, with the enticement of a relatively miniscule amount which was owed to them anyway as the derivative of the Sale of the TILT Shares that they already owned. Should any Trust Member, including individual Committee Members, wish to donate their own Income to any Charity, including the Acorn Foundation then this is their right. We note that the Acorn Foundation is already advertising in the BOP Times (at considerable cost) thanking the TECT Trustees for their generous Donation. There seems to be a "Cosy relationship" developing between the two entities, that have a common "reason for being" which is to arrogantly spend "other peoples Money" in order to stop them recklessly spending their own earnings on themselves and their Families. Should the Trustees have "philanthropic" desires, they should do it with their own money and respect that the income generated by TECT does not belong to them personally. Give me my due payment in full, and let me decide how it should be dispersed.
Mr C D And Mrs J L Freeman	Option 2	Good idea. Everyone wins.
Thelma E Grant	Option 1	My option for the consumer rebate is option 1 it will then be my choice as to what organisations to donate it. My true 'Option' would be for a reduction in the price of electricity and then everyone would benefit. I'm sure that would help to make houses warmer, reduce admissions top hospitals and helps the government reduces all costs. Just my opinion
V M King	Option 1	I see no impossible or hard to believe - i.e. incredible - reason why the current 80% policy for distributions should change for the one off special \$21M distribution. I am sure that those consumers who want to donate to THEIR chosen charity will do so. Therefore I would choose option 1.
Susan Lesley Clark	Option 1	Thank you for the information on the TECT special distribution. I support Option 1 - total distribution of the special consumer rebate to trust power customers. I am previously my husband and i have been trustpower customers for almost 50 years - i now have gas and power through trustpower, temptation to change is always around 0 however having been so loyal i consider there should be no doubt that trust power customers should receive total amount of special distribution including \$4,200,000 plus the \$16,800,00 to increase the dividend rather than decrease the distributed amount. Customers are always generous with the annual distribution and total distribution of this special rebate would be excellent recognition of their generosity
Ruth F Galloway	Option 1	Option 1 allows to be the most desirable of the 3 options and also the one which is the current distribution policy, which enables Trustpower users to distribute as they may wish, as well as 20% to being distributed to facilities and causes to benefit the community. As a trustpower user of very many year, option 1 seems to be fair and reasonable, and desirable.
Rm & Cfi Stephens	Option 2	The same as the as what it is now
Warren & Jillean Haddrell	Option 3	Our second preference would be Option 2 if there was insufficient support for Option 3
Gwyn Cumming	Option 1	People are struggling to afford power especially elderly
N Lroberts	Option 1	Elderly need power to keep warm and often want turn heaters on
Linda Peacock	Option 2	thanks for the opportunity to have a say.
Bo Stapleton	Option 1	It seems the distribution amount per customer has been almost halved! Perhaps an explanation of how & why this reduction has come about...
Clive Taylor	Option 1	Iconic Projects and Catalyst For Change Funds, we consider to be the most significant beneficiaries.

Elsie Phare	Option 1	Option 1 because it's the 80/20 split that consumers have already agreed to. I would have thought we'd just be given options of where the 20% went to. I'd prefer it go to the transformational grants not current grant funds.
Geoff Keogh	Option 3	I would like this option as a one off chance to boost resources
R C Tunncliffe	Option 1	Tect does a great job as it is with its distributions. No need to go overboard
Sherwood Alliance Limited	Option 1	Tect is a trust the beneficiaries of which are primarily the consumers. They should reap the major share of any Trust returns
Gavin And Carolyn Frost	Option 2	Would REALLY like to see the transformational grants receive all the funding. They are all very significant areas that 21m will go a long way to making a HUGE difference to all. Sorry cant untick the option selected
Chris Brough&Geoff Church	Option 2	Went for this option because others vague as to what current grants are used for.
Jane Christensen	Option 2	I feel option 2 is a good compromise as I like the organisations that will receive funds, especially our emergency services. Many thanks TECT
Nigel Hesford	Option 1	I work hard for my money and I will decide where to spend it. All (100%) of the funds should be returned to eligible consumers.
Daniel Ririnui	Option 1	Iv been a community volunteer for many years.. fundraising was our main source of funding.. we have found we had too much red tape and hoops to jump when filing applications... it become too difficult for our volunteers to complete due to handicaps an literacy issues..We understand theres only a limited funding to go around so with that in mind we pick: OPTION 1
Kelly	Option 1	Tauranga has got so expensive. Cant afford to live here as it is.
Amit Pathak		Option4: Distribute \$21M to eligible consumers
Jan Booyesen	Option 1	Our city is being choked to death by poor or no transport planning. We need better facilities so people can walk or bike to work.
Rob Schoonderwoerd	Option 1	Preferred option that fund be paid to eligible consumers who can then donate the amount of their choice to their preferred charity etc
Donna Reed	Option 2	Good to give something back to the community
Rick Percy	Option 1	A good balance.
Bob Tubb		I think you may get a better response to your fund distribution plan for the special distribution if the target recipients were more clearly explained. For example, Social Link reads like a bureaucratic talk fest rather than an action organisation. Plan expand on positive results of the distribution to this organisation today. Thank you.
Sheryl Mclay	Option 3	A no brainer. The city needs all the help it can get with new facilities. Just make sure they are good facilities!!
Wayne Wright	Option 2	This looks to be the most balanced
Shane Duncan	Option 1	Why is this even a question? Stop trying to take our money.
Jo Bond	Option 2	I would have like to see an option for the funds in option 2 to go to Iconic Projects rather than the transformational grant.
R. Ford	Option 1	As I understand, this option still leaves some funds for distribution.
Vic And Margot Sterling	Option 1	Statements re Iconic Projects and Positive Change funds are far too generalised .The Trust can make a substantial impact such as what it has done to create its own building by maximising the use of funds Current grant funds are already adequately allocated it would seem.
Gail E Henry	Option 1	I am not impressed that there is no option for all the funds to return to eligible consumers. This is the consumers money, we should have that choice.
Mr G H & Mrs J Mckenzie	Option 1	We would prefer to receive the \$295 as we are eligible consumers. Many thanks G & J Mckenzie
John Stent	Option 2	would like to see the \$7.35M (option 2) to be divided between the option 1 grant funds and Option 2 frant initiatives. Thankyou
Lexie Martin	Option 2	I feel this is a fair option .
R Cramp	Option 1	Prefer to do my own extra donations.
Ross Cramp Transition Developments Ltd	Option 1	Prefer to do my own extra charitable donations.
Ross Cramp Steel Form	Option 1	Prefer to do my own extra donations.
J Seymour & L O' Brien	Option 1	I would like to decide what charity to donate a portion of this money to
Angela Connor	Option 1	The one-off special dividend should be distributed as per the current distribution policy ie. approx 80% to eligible consumers. If eligible consumers are legally entitled to this money then they should receive it in full. An option to donate back could be made available for those consumers wishing to support Grants/Projects (On an individual basis, not against consumers will).
Brigid & Matt Crawford	Option 2	Hi there, We would like to see the Special distribution to be via Option 2. Thanks.
Sally Downing	Option 2	My name is Sally Downing. I would like to see option 2 . I would find any payment very helpful but feel the option 2 is very valuable to our community.
Rhonda Bethune	Option 1	I would like to see the money distributed first to the consumers at \$295.00 and have the remainder split equally to the charities you have stated.
Debbie Young	Option 2	Why couldnt the money be spread between the three options.
Jo	Option 1	If not opt 1 then opt 2
Bruce Dixon	Option 1	We live on our super and it is always nice to receive extra cash.
Chris Shadbolt	Option 3	This is a one off distribution and would be better utilised for the community and Acorn foundation if the total amount is given to them.
Barbara Atkins	Option 2	Rebate very much appreciated-especially with Winter on its way! Funds to Emergency services a must!! Thanks
Bruce Burrows	Option 1	why wasn't there a 4th option. 100% to consumers ? Why was this one off payment made.?. was it because Trustpower were feeling guilty for over charging consumers !. And now you want to take some of this away from us.
Sleath	Option 2	My preference is for option 2 with second pref for option 1
Christine Dean	Option 1	I believe you need to adhere to original trust document allocation of distributions.
Elizabeth Bristow	Option 1	Pensioner and very grateful.
Danielle Cubis	Option 3	We're a growing city and we need to invest more in projects/initiatives that will turn us into an integrated city geared towards the future.
Linda Biddington	Option 2	Listen to the people!
Laura Wragg	Option 3	Awesome initiative, let's hope people will be totally selfless in their choice and create a lasting legacy for the good of many.
M P Townsend	Option 1	From discussions with friends and other family members elsewhere, its apparent Trustpower consumers pay more for power than some, so any unexpected assistance is welcomed.
Dennis Dobson	Option 2	This option gives everybody something
William & Beverley Lorimer	Option 1	We have reviewed the options & consider as a loyal TECT consumer we along with other Trustpower account holders should receive the largest benefit from this distribution.
Natalie Brock		Supported option 1 and 2
Mr D & Mrs C Marshall	Option 1	10 years ago in April 2009 we voted to keep the 80 to 20 ratio share out and believe that should continue. Our second preference is for option2.. If option 3 is carried we and many of our friends will switch to Genesis Energy. Leave well alone..
Janet Siemelink	Option 2	I like it that Emergency services will receive funds. They are important to our Community.
Peter Rotherham	Option 3	community need is greater than mine
John & Andrea Wade	Option 1	The 80/20 split is your only choice.Option 1 is the only choice that does this but I am not in favour of the iconic projects or the catalyst for change funds. I would like each consumer to be able to indicate which groups in the community receive support. Then all consumer choices could be tabulated to give the trustees a good indication of where the support could be targeted. Everyone then has some direct input and feels they contributed to the grants outcome. It would be good to have a better say in where my community funds go.
Trish Davies	Option 1	This is needed by many that I know to keep their basic accounts covered.
Larry Baldock	Option 3	I would like to see the grant fund.for transformational initiatives like battle of Gate Pa museum, Aquarium, and Stadium at domain to be increased.
Glyn Fryett	Option 1	would like total amount returned to consumers so they can choose to grant their own charities. this survey will only get the views of the white upper class.the survey is flawed.
Melissa Smith	Option 2	Option 2 would be amazing, emergency services could use the help and so could my family.
Andrew Warren	Option 2	I support option 2. Reason being: I am a Trustee of Homes of Hope and as a charitable Trust we serve babes and children who are in severe trauma when they arrive due to family breakdown and the need for OT to remove them from their birth families. We are already considering how to expand our facilities to bring more assistance to more people. This includes physical facilities as well as therapeutic services of the highest order. I realise there is no guarantee that Homes of Hope would be successful, but we would love to be part of making this one off distribution truly transformational. Thank You.
Laurie Coughy	Option 1	Every little helps for all consumers especially for pensioners who are on a limited budget, with everything else going up all the time including your annual increase
Keith & Jenny Elliott	Option 2	Happy to just be able to provide our feedback.

V E & Pg Nelson	Option 1	We prefer this option over the others.
R.M. & P.J. Tuck	Option 1	You do a great job.
Mr A J Bush	Option 1	Very disappointing there was no option for complete payout to consumers
Diane Goldsack	Option 2	I would like to see funding for emergency services and environment issues
V J Munn	Option 2	I do already donate to many organisations so I would like to have my special distribution grant so that. I can donate the equivalent to local services of my choice.
Martin Stacey	Option 1	if you think its possible to change the 80% distribution policy and have options 2 and 3 as a choice then you should have a fourth option where all \$21m is distributed to consumers. ie \$369. Can you tell me where the Tilt share proceeds have gone, and did any of the dividends from Tilt shares and now their investments dividends ever get distributed to the consumers.? this is never mentioned....please tell us .
Mike Harman	Option 1	the community would not get any handouts if it wasnt for us loyal customers. I think that there is a good enough pot now that is growing because of the customers that every one in the community benefits from without us customers forgoing what is really our money. all the non trustpower people still benefit from us now. this is why i say distribute the option one.
Hazelton Leslie Archibald	Option 1	Any rebate we get is a help against the cost of power.
Tauranga Historical Society (Inc.)	Option 3	The Society sees overall community benefit as being the major factor here.
Jacobson & Marshall	Option 1	This is a CONSUMER trust so consumers should get the most benefit.
Charlotte Volschenk	Option 1	I bet the Tect board members get a whole lot more than you are offering consumers!
Mary Foster	Option 2	We would like to think that if this option does go ahead, the emergency services would receive a large chunk of the money.
Brian Walters	Option 1	Return this money to the Trustpower account holders as discussed last year to reduce their power account.
C Bellekom	Option 1	\$295.00 to my bank account
Tracy Tredinnick	Option 2	I think Option 2 is a fair option.
Lee Higgins	Option 3	Lloyd and I really appreciate the way TECT grants improve our local and wider community so that more of us can enjoy the benefits and many groups can prosper. Thanks for your good work.
Lindsay Martyn	Option 3	Go for it! Make a difference transforming the community with this windfall.
Sue Tonkin	Option 2	I understand this is the age of technology, but as diplomatic as it is to be asked for input there must be a large amount of trustees who don't have the ability to have their say through the options open to them. For alot of people in the community the phone is their only means of communication so I wonder how a fair assessment is made of how trustees want this money distributed.
Willem Jonkers	Option 1	We will only support option 2, Ifall of your extra \$7,350,000 will go to Emergency Services solely. That is not a denial that the other proposed charity objectives are not worthwhile or not needy, but are related to two opinions. One is that it is unrealistic to believe, that you can even make a small dent in the other 3 problems with the money you have now available. The second one, judgemental if you like, is that the problems in the areas of First 1000 days and Safe and Healthy Homes are too much related to chosen life styles of parents and people suffering. Throwing any money at those will not change their life styles and therefore not solve the problems. We would not object if some support would go to credible and effective community groups, working on the environment, which indeed is a growing world problem, but you should pay that out of your normal annual distribution plan, at the expense of less needy targets. Money to Emergency Services will make a direct and lasting difference.
Sowmya Bijo		Supported option 1 and 2
Matt & Liz Webb	Option 2	I strongly support option 2. Consumers are struggling to pay household bills and the money needs to go back to those families that have supported Truspower and Tect. I also support the money split with with Transformation grants, but only the Emergency services and environmental sustainability. The "top ups current Grant fundings" are too vague to support and offer no guarantee where the money is going or if it will be lost into administration costs and unrealistic schemes that do not really benefit to the community.
Mr Fc & Mrs Ml Crawshaw	Option 1	As 20% is already given to charities and grants from the annual distribution; and we are struggling to pay our day to day living costs, (cutting back on some basics like food or heating) living on the pension we would like Option 1.
Ann Mercer	Option 2	This seems a good option for all.
Debbie Dufty	Option 2	We would rather see money go to emergency services such as Air Ambulance/ St John Ambulance and the other three significant areas - at least you have been a little more specific in naming these areas. We don't need the \$240,00 that can be donated to them too.
Jude Empson	Option 1	It is a consumers trust not a charitable trust.
Heather Wills	Option 2	Option 2...but please extend the benefit beyond Tauranga city into the western bay towns & villages. Our environment needs help. Thank you, your cheque near Xmas makes a big difference to a lot of people...this extra money will be a lovely winter bonus.
Kerb & Concrete	Option 2	Sounds a bit like "Hobsons Choice" ? What about the option of 80% to eligible consumers and 20% to transformational grants?
Rebecca Hall	Option 1	Good luck much appreciated thanks
Mr T H & Mrs E Prince	Option 1	Dear Sir/Madam, We thank you for your letter of 18th April 2019. We find it difficult to understand when its total millions we are stated and in next paragraph, the individual consumer figures. Are those figures paid as it is with the present payments. The colour printing is difficult to read for senior folk. Printing in Black on white is more discernible and its cheaper. You can colour the graphic to your hearts content. What ever happened to the previous prior offer of a lump sum. It is a length gap in communications. To get back to the offer option. We pick to offer to bring MAXIMUM returns to the consumer. What was wrong with the original scheme, why cant you leave well alone. We notice that the original payments were over \$600, surely the profit from Trustpower hasn't dropped. Yours faithfully, T H & E Prince
Lloyd Christie		With respect i say "Boy o boy" haven;t you TECT fellows made a feast out of this issue. Keep it simple. Simplicity and efficiency go hand in hand:- put the windfall into your main account and invest it and then distribute the earnings annually in the usual manner. Yours sincerely, Lloyd Christie
R M Donald	Option 1	Option one will help struggling families
Merle Bray	Option 1	Would prefer to choose who we donate our portion to.
Julia Sich	Option 2	Greetings, I would like to offer my feedback for Option 2. Consumers receive \$240 and Transformational services receive 7,350,000.
Tarnished Frocks And Divas Charitable Trust	Option 3	We have chosen option 3 as we see this distribution of funds benefiting the community and making a real difference in our fast growing region. The Bay of Plenty is a great area with our population and economic growth the highest in New Zealand. This bonus windfall is an amazing opportunity for TECT to address some of the problems that have arisen due to our rapid growth with innovative and carefully considered solutions.
Gv & Mj Anderson	Option 1	Our electricity comes from Trustpower, therefore any 'special dividend' that comes to Trustpower SHOULD reasonably be 'wholly' distributed back to the defacto shareholders of TECT(consumers).
M. Steeghd	Option 2	Thanks for allowing us to give feedback!
Cindy Hill-Rennie	Option 1	Power is far too expensive. It is a huge monthly expense for any household.
Karen Schicker		Supported option 1 and 2
M E Carr	Option 1	My reasons are we are the power users and therefore deserve the funds generated.
Mrs Heather Catherine Sheely	Option 2	
J. C. And N. C. Hayward	Option 2	
J. M. Beveridge	Option 2
